FIT5077 e-Business application and development - Semester 1, 2009

Unit leader :

Dr. Dammina Alahakoon

Lecturer(s) :

Clayton

- Mr. Daswin De Silva

Gippsland

- Dr. Suryani Lim

Introduction

Welcome to FIT5077 -E-Business Application and Development - for semester 1, 2009. This is a 6 point unit available to all postgraduate degree programs in the Faculty of IT.

Unit synopsis

(ASCED code: 029900)

This unit extends students knowledge and skills to make use of current technologies in developing business applications on the internet platform. The unit provides an opportunity for students to explore net centric computing focusing on business applications development. The unit has been designed to equip future web application developers and managers of business solutions. Thus practical exercises will be illustrative with industrial strength and technology issues will be given equal coverage with technology details. The primary aim of the unit is to familiarise students with the currently popular web technologies so that their design and implementation decisions in the future will be informed and therefore produce successful systems with a high degree of probability. Topics coverage include data and messages using XML, architecture, scripting and programming in .NET platform

Learning outcomes

(a) To acquire the **Knowledge and Understanding** of:

- Adoption and development of an e-Business strategy
- Challenges in the planning stage of an e-Business venture
- Concepts of revenue modelling in an e-Business context
- Technology architectures underpinning the deployment of e-Business systems, including data formats and various programming solutions

- Issues in the planning, implementation and management of the e-Business system
- Applying object-oriented paradigms to implement e-Business solutions
- Various technologies in design and implementation of e-Business applications

(b) To develop the following **Attitudes, Values and Beliefs**:

- Appreciate developments in net centric computing and web technologies
- Appreciate the advantages of adopting e-Business solutions
- Recognise the value of an e-Business strategy
- Understand the importance and value of a variety of web technologies for implementing e-Business solutions

(c) To develop the following **Practical Skills**:

- Formulate an effective e-Business strategy
- Identify suitable web technology specific scenarios
- Develop client side applications for an e-Business solution
- Develop server side components for an e-Business solution
- Critically review an e-Business system

(d) In addition, it is expected that the following **Relationships, Communication and Team Work** skills will be developed and enhanced:

- Document and communicate an e-Business solution, from strategy to implementation
- Work in a team during development of such a solution
- Communicate and coordinate during the team activities

Workload

Workload commitments are:

- * two-hour lecture and
- * one-hour tutorial (or laboratory) (requiring advance preparation)
- * a minimum of 2-3 hours of personal study per one hour of contact time in order to satisfy the reading and assignment expectations.

You will need to allocate up to 5 hours per week in some weeks, for use of a computer, including time for newsgroups/discussion groups.

Unit relationships

Prerequisites

Before attempting this unit you must have satisfactorily completed

FIT9004 Computer programming for business or CSE9000 or BUS9520

, or equivalent.

Relationships

FIT5077 is an elective unit in all FIT masters degrees.

Before attempting this unit you must have satisfactorily completed

FIT9004 or CSE9000 or BUS9520, or equivalent..

You may not study this unit and

BUS5960 B2C Internet Commerce

in your degree.

Continuous improvement

Monash is committed to 'Excellence in education' (Monash Directions 2025 - <http://www.monash.edu.au/about/monash-directions/directions.html>) and strives for the highest possible quality in teaching and learning.

To monitor how successful we are in providing quality teaching and learning Monash regularly seeks feedback from students, employers and staff. One of the key formal ways students have to provide feedback is through Unit Evaluation Surveys. The University's Unit Evaluation policy (<http://www.policy.monash.edu/policy-bank/academic/education/quality/unit-evaluation-policy.html>) requires that every unit offered is evaluated each year. Students are strongly encouraged to complete the surveys as they are an important avenue for students to "have their say". The feedback is anonymous and provides the Faculty with evidence of aspects that students are satisfied and areas for improvement.

Faculties have the option of administering the Unit Evaluation survey online through the my.monash portal or in class. Lecturers will inform students of the method being used for this unit towards the end of the semester.

Student Evaluations

If you wish to view how previous students rated this unit, please go to <http://www.adm.monash.edu.au/cheq/evaluations/unit-evaluations/>

Unit staff - contact details

Unit leader

Dr. Damminda Alahakoon

Lecturer(s) :

Mr. Daswin De Silva

Contact hours : TBA

Dr. Suryani Lim

Teaching and learning method

The unit will be delivered via lectures and laboratories.

Lecture: During the lecture, your lecturer will introduce key theoretical concepts and demonstrate various approaches to database tasks. The time in lectures is quite brief, please ensure you gain the best advantage from this time by:

- Prior to the lecture -
 - reading the study guide for the appropriate week, and
 - downloading and reading the lecture notes,
- During the lecture -
 - annotate a printed set of lecture notes as the lecture proceeds, and
 - participate, question, seek clarification
- After the lecture -
 - read over you notes and make sure you understand the concepts
 - seek help if you are unsure

Communication, participation and feedback

Monash aims to provide a learning environment in which students receive a range of ongoing feedback throughout their studies. You will receive feedback on your work and progress in this unit. This may take the form of group feedback, individual feedback, peer feedback, self-comparison, verbal and written feedback, discussions (on line and in class) as well as more formal feedback related to assignment marks and grades. You are encouraged to draw on a variety of feedback to enhance your learning.

It is essential that you take action immediately if you realise that you have a problem that is affecting your study. Semesters are short, so we can help you best if you let us know as soon as problems arise. Regardless of whether the problem is related directly to your progress in the unit, if it is likely to interfere with your progress you should discuss it with your lecturer or a Community Service counsellor as soon as possible.

Unit Schedule

Week	Topic	Key dates
1	Introduction to e-Business - Trends and Implications	Lecture 1

2	e-Business Strategy	Lecture 2
3	Designing an e-Business Solution	Lecture 3
4	e-Business Implementation Technologies	Lecture 4
5	Server Side Technologies I	Lecture 5
6	Server Side Technologies II	Lecture 6
Mid semester break		
7	Server Side Technologies III	Lecture 7
8	Client Side Technologies I	Lecture 8
9	Client Side Technologies II	Lecture 9
10	Client Side Technologies III	Lecture 10
11	Web Services in e-Business	Lecture 11
12	Emerging Technologies	Lecture 12
13	Revision	Lecture 13

Unit Resources

Prescribed text(s) and readings

(Harvey & Paul) Deitel & Associates, Inc, Internet & World Wide Web: How to Program, Prentice Hall, 2008 (9780131752429)

Randy Connolly, Core Internet Application Development with ASP.NET 2.0, Prentice Hall, 2007 (9780321419507)

Cristian Darie and Karli Watson, Beginning ASP.NET 2.0 E-Commerce in C# 2005: From Novice to Professional , APress, 2005 (9781590594681)

Text books are available from the Monash University Book Shops. Availability from other suppliers cannot be assured. The Bookshop orders texts in specifically for this unit. You are advised to purchase your text book early.

Recommended text(s) and readings

S. Ann Becker, E-Commerce : Concepts, Tools and Applications, Information Science Reference, 2008 Kalakota R and Whinston A B, Frontiers of Electronic Commerce, Addison-Wesley Publishing Company, 1996

Required software and/or hardware

Microsoft Visual Studio 2005

Microsoft IIS version 5 or above

Equipment and consumables required or provided

Students studying off-campus are required to have the minimum system configuration specified by the Faculty as a condition of accepting admission, and regular Internet access. On-campus students, and those studying at supported study locations may use the facilities available in the computing labs. Information about computer use for students is available from the ITS Student Resource Guide in the Monash University Handbook. You will need to allocate up to **n** hours per week for use of a computer, including time for newsgroups/discussion groups.

Study resources

Study resources we will provide for your study are:

- * Weekly detailed lecture notes outlining the learning objectives, discussion of the content, required readings and exercises;
- * Weekly tutorial or laboratory tasks and exercises with sample solutions provided one to two weeks later;
- * Assignment specifications and sample solutions;
- * A sample examination and suggested solution
- * This Unit Guide outlining the administrative information for the unit;
- * The unit web site on MUSO, where resources outlined above will be made available.

Library access

The Monash University Library site contains details about borrowing rights and catalogue searching. To learn more about the library and the various resources available, please go to <http://www.lib.monash.edu.au>.

The Educational Library and Media Resources (LMR) is also a very resourceful place to visit at <http://www.education.monash.edu.au/library/>

Monash University Studies Online (MUSO)

All unit and lecture materials are available through MUSO (Monash University Studies Online). Blackboard is the primary application used to deliver your unit resources. Some units will be piloted in Moodle. If your unit is piloted in Moodle, you will see a link from your Blackboard unit to Moodle (<http://moodle.monash.edu.au>) and can bookmark this link to access directly. In Moodle, from the Faculty of Information Technology category, click on the link for your unit.

You can access MUSO and Blackboard via the portal: <http://my.monash.edu.au>

Click on the Study and enrolment tab, then Blackboard under the MUSO learning systems.

In order for your Blackboard unit(s) to function correctly, your computer needs to be correctly configured.

For example:

- Blackboard supported browser
- Supported Java runtime environment

For more information, please visit: <http://www.monash.edu.au/muso/support/students/downloadables-student.html>

You can contact the MUSO Support by phone : (+61 3) 9903 1268

For further contact information including operational hours, please visit: <http://www.monash.edu.au/muso/support/students/contact.html>

Further information can be obtained from the MUSO support site: <http://www.monash.edu.au/muso/support/index.html>

Assessment

Unit assessment policy

To pass this unit, a student must obtain :

- * 40% or more in the unit's examination and
 - * 40% or more in the unit's non-examination assessment
- and
- * an overall unit mark of 50% or more

If a student does not achieve 40% or more in the unit examination or the unit non-examination assessment then a mark of no greater than 44-N will be recorded for the unit.

Assignment tasks

- **Assignment Task**

Title : Assignment 1 (Individual)

Description :

Assignment specification will be handed out in lectures and also be available on blackboard

Weighting : 20%

Criteria for assessment :

Due date :

- **Assignment Task**

Title : Assignment 2 (Group)

Description :

Assignment specification will be handed out in lectures and also be available on blackboard

Weighting : 20%

Criteria for assessment :

Due date :

Examinations

- **Examination 1**

Weighting : 60%

Length : 2 hours

Type (open/closed book) : Closed book

Assignment submission

Assignments will be submitted by **paper** submission. The due date is the date by which the the submission is to be posted.

Assignment coversheets

All assignments should include an appropriate signed FIT assignment cover page.

Assignment coversheets can be found,

via the "Student assignment coversheets" (<http://infotech.monash.edu.au/resources/student/assignments/>) page on the faculty website

University and Faculty policy on assessment

Due dates and extensions

The due dates for the submission of assignments are given in the previous section. Please make every effort to submit work by the due dates. It is your responsibility to structure your study program around assignment deadlines, family, work and other commitments. Factors such as normal work pressures, vacations, etc. are seldom regarded as appropriate reasons for granting extensions. Students are advised to NOT assume that granting of an extension is a matter of course.

Late assignment

Assignments received after the due date will be subject to a penalty of 5% per day, including weekends. Assignments received later than one week (seven days) after the due date will not normally be accepted.

Return dates

Students can expect assignments to be returned within two weeks of the submission date or after receipt, whichever is later.

Assessment for the unit as a whole is in accordance with the provisions of the Monash University Education Policy at <http://www.policy.monash.edu/policy-bank/academic/education/assessment/>

We will aim to have assignment results made available to you within two weeks after assignment receipt.

Plagiarism, cheating and collusion

Plagiarism and cheating are regarded as very serious offences. In cases where cheating has been confirmed, students have been severely penalised, from losing all marks for an assignment, to facing disciplinary action at the Faculty level. While we would wish that all our students adhere to sound ethical conduct and honesty, I will ask you to acquaint yourself with the University Plagiarism policy and procedure (<http://www.policy.monash.edu/policy-bank/academic/education/conduct/plagiarism-procedures.html>) which applies to students detected plagiarising.

In this University, cheating means seeking to obtain an unfair advantage in any examination or any other written or practical work to be submitted or completed by a student for assessment. It includes the use, or attempted use, of

any means to gain an unfair advantage for any assessable work in the unit, where the means is contrary to the instructions for such work.

When you submit an individual assessment item, such as a program, a report, an essay, assignment or other piece of work, under your name you are understood to be stating that this is your own work. If a submission is identical with, or similar to, someone else's work, an assumption of cheating may arise. If you are planning on working with another student, it is acceptable to undertake research together, and discuss problems, but it is not acceptable to jointly develop or share solutions unless this is specified by your lecturer.

Intentionally providing students with your solutions to assignments is classified as "assisting to cheat" and students who do this may be subject to disciplinary action. You should take reasonable care that your solution is not accidentally or deliberately obtained by other students. For example, do not leave copies of your work in progress on the hard drives of shared computers, and do not show your work to other students. If you believe this may have happened, please be sure to contact your lecturer as soon as possible.

Cheating also includes taking into an examination any material contrary to the regulations, including any bilingual dictionary, whether or not with the intention of using it to obtain an advantage.

Plagiarism involves the false representation of another person's ideas, or findings, as your own by either copying material or paraphrasing without citing sources. It is both professional and ethical to reference clearly the ideas and information that you have used from another writer. If the source is not identified, then you have plagiarised work of the other author. Plagiarism is a form of dishonesty that is insulting to the reader and grossly unfair to your student colleagues.

Register of counselling about plagiarism

The university requires faculties to keep a simple and confidential register to record counselling to students about plagiarism (e.g. warnings). The register is accessible to Associate Deans Teaching (or nominees) and, where requested, students concerned have access to their own details in the register. The register is to serve as a record of counselling about the nature of plagiarism, not as a record of allegations; and no provision of appeals in relation to the register is necessary or applicable.

Non-discriminatory language

The Faculty of Information Technology is committed to the use of non-discriminatory language in all forms of communication. Discriminatory language is that which refers in abusive terms to gender, race, age, sexual orientation, citizenship or nationality, ethnic or language background, physical or mental ability, or political or religious views, or which stereotypes groups in an adverse manner. This is not meant to preclude or inhibit legitimate academic debate on any issue; however, the language used in such debate should be non-discriminatory and sensitive to these matters. It is important to avoid the use of discriminatory language in your communications and written work. The most common form of discriminatory language in academic work tends to be in the area of gender inclusiveness. You are, therefore, requested to check for this and to ensure your work and communications are non-discriminatory in all respects.

Students with disabilities

Students with disabilities that may disadvantage them in assessment should seek advice from one of the following before completing assessment tasks and examinations:

- Faculty of Information Technology Student Service staff, and / or
- your Unit Coordinator, or
- Disabilities Liaison Unit

Deferred assessment and special consideration

Deferred assessment (not to be confused with an extension for submission of an assignment) may be granted in cases of extenuating personal circumstances such as serious personal illness or bereavement. Information and forms for Special Consideration and deferred assessment applications are available at <http://www.monash.edu.au/exams/special-consideration.html>. Contact the Faculty's Student Services staff at your campus for further information and advice.
