FIT1001 Computer systems - Semester 2, 2009

Chief Examiner:

Dr Sid Ray  
Senior Lecturer  
Phone: +61 3 990 55185  
Fax: +61 3 990 55159

Lecturer(s) / Leader(s):

Clayton

Dr Sid Ray  
Senior Lecturer  
Phone: +61 3 990 55185  
Fax: +61 3 990 55159

Malaysia

Dr Simon Egerton

Additional communication information:

Sid Ray, Room 133, Building 63, Clayton

Consultation time (subject to change): Wednesday, 11am-12noon

Email: Sid.Ray@infotech.monash.edu.au
Welcome to FIT1001, Computer Systems. This 6 point unit is core to all undergraduate degree programs in the Faculty of IT. This unit has been designed to provide you with an appreciation of the architecture and operations of a computer system and its system software.

This unit will introduce students to basic computer hardware and operating systems software with emphasis on the concepts required to understand the low-level and internal operations of computer systems. In particular, this includes study of data representation, simple digital logic, computer organisation including CPU, memory and input/output devices, as well as system software and operating system concepts. The intention is to provide opportunities for students to relate the hardware knowledge covered in this unit to the concepts learned in their introductory programming and systems analysis classes and to give a more complete understanding of how hardware and software are used to build systems. This provides opportunities for students to relate the use of programming languages and studies of system design and project management to their implementation on computer hardware. This unit will introduce students to basic computer hardware and operating systems software with emphasis on the concepts required to understand the low-level and internal operations of computer systems.

On completion of this unit, students will be able to:

1. understand basic computer structure and operation and demonstrate use of the associated vocabulary;
2. demonstrate an understanding of the concepts of data representation, computer arithmetic and boolean algebra using appropriate methods of implementation;
3. demonstrate knowledge of internal bus, memory, I/O organisations and interfacing standards;
4. describe the internal operation of the CPU and explain how it is used to execute instructions;
5. demonstrate an understanding of the basics of operating systems and system software;
6. identify factors that affect computer performance.

For on campus students, workload commitments are:

- two one-hour lectures per week
- 12 two-hour tutorials, starting in week 2.
- a minimum of 1.5 hours of personal study per 1 hour of contact time in order to satisfy the reading and assignment expectations. This gives a total of at least 6 hours of study per week.
FIT1001 Computer systems - Semester 2, 2009

**Prohibitions**

CFR1125, CFR1140, CFR1202, COT1140, CSE1201, CPE1002

**Relationships**

FIT1001 is a core unit of the Bachelor of Information Technology, Bachelor of Computer Science, Bachelor of Business Systems and Bachelor of Software Engineering. It is a prerequisite for many subsequent units in the remainder of these degrees. There are no prerequisites for this unit.
FIT1001 Computer systems - Semester 2, 2009

Teaching and learning method

Timetable information

For information on timetabling for on-campus classes please refer to MUTTS, http://mutts.monash.edu.au/MUTTS/

Tutorial allocation

On-campus students should register for tutorials/laboratories using the Allocate+ system: http://allocate.cc.monash.edu.au/

Unit Resources

Prescribed text(s) and readings

Text books are available from the Monash University Book Shops. Availability from other suppliers cannot be assured. The Bookshop orders texts in specifically for this unit. You are advised to purchase your text book early.

Recommended text(s) and readings

Study resources

Study resources we will provide for your study are:

Lecture Notes and tutorial sheets will be made available to the students via the FIT1001 MUSO website.

Short extracts from a number of text books will be made available to all students via the FIT1001 MUSO website.

The FIT1001 web site on MUSO, where lecture slides, tutorial exercises, practical assignment specifications, sample solutions, software and supplementary material will be available.

Newsgroups and eMail discussion lists available via the FIT1001 unit web site.
Assessment

Overview

Examination (3 hours): 70%
Assignments and tests: 30%

Faculty assessment policy

To pass a unit which includes an examination as part of the assessment a student must obtain:

- 40% or more in the unit’s examination, and
- 40% or more in the unit’s total non-examination assessment, and
- an overall unit mark of 50% or more.

If a student does not achieve 40% or more in the unit examination or the unit non-examination total assessment, and the total mark for the unit is greater than 44% then a mark of no greater than 44-N will be recorded for the unit.

The unit is assessed with 4 tutorial class tests, an one hour mid-semester test and a three hour closed book examination.

Assignment tasks

Assignment coversheets

Assignment coversheets are available via "Student Forms" on the Faculty website: http://www.infotech.monash.edu.au/resources/student/forms/

You MUST submit a completed coversheet with all assignments, ensuring that the plagiarism declaration section is signed.

Assignment submission and return procedures, and assessment criteria will be specified with each assignment.

- Assignment task 1

  Title:  
  Four tutorial tests on LN1 and LN2, LN3, LN4 and LN5, LN6 and LN7 (On-campus students only)

  Description:  
  Closed-book test held during the tutorial. 1 hour duration.

  Weighting:  
  5% each test

  Due date:  
  Weeks 5, 7, 10 and 12

  Remarks:  
  OCL students will be asked to complete two assignments in place of all on-campus tests (details see the remarks section of the next assignment task.)
• **Assignment task 2**

  **Title:**
  TEST (on-campus students only)

  **Description:**
  Closed-book test held during the lecture. 1 hour duration.

  **Weighting:**
  10%

  **Due date:**
  Week 9

  **Remarks:**
  OCL students will be asked to complete two assignments, each with a weighting of 15% in place of all the on-campus tests.

  Assignment 1: due Week 8

  Assignment 2: due Week 12

**Examination**

  **Weighting:** 70%
  **Length:** 3 hours
  **Type (open/closed book):** closed book

  **Remarks:**
  exam hurdle 40% of exam mark

**See Appendix for End of semester special consideration / deferred exams process.**

**Due dates and extensions**

Please make every effort to submit work by the due dates. It is your responsibility to structure your study program around assignment deadlines, family, work and other commitments. Factors such as normal work pressures, vacations, etc. are not regarded as appropriate reasons for granting extensions. Students are advised to NOT assume that granting of an extension is a matter of course.

Students requesting an extension for any assessment during semester (eg. Assignments, tests or presentations) are required to submit a Special Consideration application form (in-semester exam/assessment task), along with original copies of supporting documentation, directly to their lecturer within two working days before the assessment submission deadline. Lecturers will provide specific outcomes directly to students via email within 2 working days. The lecturer reserves the right to refuse late applications.

A copy of the email or other written communication of an extension must be attached to the assignment submission.

Refer to the Faculty Special consideration webpage or further details and to access application forms: [http://www.infotech.monash.edu.au/resources/student/equity/special-consideration.html](http://www.infotech.monash.edu.au/resources/student/equity/special-consideration.html)
Return dates

Students can expect assignments to be returned within two weeks of the submission date or after receipt, whichever is later.
