FIT3081 Image processing - Semester 2, 2010

Chief Examiner:

Dr Sid Ray

Senior Lecturer Phone: +61 3 990 55185

Fax: +61 3 990 55159

Lecturer(s) / Leader(s):

Clayton

Dr Sid Ray

Senior Lecturer Phone: +61 3 990 55185 Fax: +61 3 990 55159

Additional communication information:

Lecturer: Sid Ray, Room 133, Bldg. 63, Clayton

Consultation Hours: Friday 4-5pm (To be finalized in consultation with students)

Email: Sid.Ray@monash.edu

Introduction

Welcome to FIT3081 Image Processing.

Please note that the sequence of lectures and topics implied through their inclusion in the weekly topic list in this unit guide may be varied during the semester at the discretion of the FIT3081 Chief Examiner, as long as such variation is judged by the FIT3081 Chief Examiner not to compromise the unit objectives.

If you have concern regarding prerequisites mentioned later in this unit guide then please contact the lecturer.

Unit synopsis

This unit covers fundamental techniques in image processing. Topics include image representation and enhancement, thresholding, image algebra, neighbourhood operations on images, Fourier methods, edge detection, feature extraction and representation, shape, texture, segmentation, classification, restoration, image compression, and colour and multiband image processing.

Learning outcomes

At the completion of this unit students will have - Developed the ability to:

- understand the processes of image formation, acquisition, processing and analysis;
- develop programs for manipulating grey level, colour and multi-spectral images; and
- use standard image processing software;
- undertake computer analysis of medical, remotely-sensed, document, and other images.

Developed attitudes that enable them to:

- understand the role of visual information processing and analysis; and
- apply the theory and methods in practical problem solving.

Developed the skills to:

- write programs to carry out basic image processing tasks such as image denoising, image filtering and segmentation of an image in its constituent parts or objects;
- write programs to carry out advanced image processing and analysis tasks such as image segmentation, image, image classification, image data mining, and robotic vision; and
- build a software system for processing and analysis of image data.

Demonstrated the communication and teamwork skills necessary to:

- function as an image processing specialist in a group which is involved in developing a major software system; and
- produce appropriate documentation.

Contact hours

2 hrs lectures/wk, 1 hr laboratory/wk, 1 hr tutorial/wk

Workload

- Two one-hour lectures per week,
- 12 one-hour tutorials starting week 2,
- 11 one-hour computer labs starting week 3.

Unit relationships

Prerequisites

FIT2004 (or CSE2304) and FIT2014 (or CSE2303)

Students are expected to have knowledge of

- + programming in C in a Linux environment
- + introductory knowledge of Mathematics in the areas of Calculus, Vectors and Matrices, and Probability and Statistics.

Prohibitions

CSE3314

Teaching and learning method

Teaching approach

Timetable information

For information on timetabling for on-campus classes please refer to MUTTS, http://mutts.monash.edu.au/MUTTS/

Tutorial allocation

On-campus students should register for tutorials/laboratories using the Allocate+ system: http://allocate.its.monash.edu.au/

Unit Schedule

Week	Date*	Topic	Key dates	
1	19/07/10	Image Processing Fundamentals; Arithmetic Operations on Images		
2	26/07/10	Introduction to Image Enhancement Techniques; Linear Stretching		
3	02/08/10	Spatial Filtering Methods; Sharpening Filters		
4	09/08/10	Histogram Equalization; Line and Edge Detection		
5	16/08/10	Image Thresholding; Image Segmentation Methods		
6	23/08/10	Clustering-Based Image Segmentation; Region Growing; Splitting and Merging	Assignment 1 due Thursday this week	
7	30/08/10	Texture Characterization; Co-occurrence Matrices; Entropy-Based Thresholding		
8	06/09/10	Image Filtering in Frequency Domain		
9	13/09/10	Image Data Compression		
10	20/09/10	Image Representation and Description		
Mid semester break				
11	04/10/10	Image Recognition and Interpretation		
12	11/10/10	Colour and Multband Image Processing	Assignment 2 due Thursday this week	
13	18/10/10	Revision; Teaching Evaluation		

^{*}Please note that these dates may only apply to Australian campuses of Monash University. Off-shore students need to check the dates with their unit leader.

Unit Resources

Prescribed text(s) and readings

Prescribed Text

R. C. Gonzalez and R. E. Woods, Digital Image Processing, Prentice Hall, 3rd Edition, 2008.

Text books are available from the Monash University Book Shops. Availability from other suppliers cannot be assured. The Bookshop orders texts in specifically for this unit. You are advised to purchase your text book early.

Recommended text(s) and readings

Recommended Reading

R. C. Gonzalez and R. E. Woods, Digital Image Processing using MATLAB, Prentice Hall, 2004. A. K. Jain, Fundamentals of Digital Image Processing, Prentice-Hall, 1990. W. Niblack, An Introduction to Digital Image Processing, PHI, 1986. D. H. Ballard and C. M. Brown, Computer Vision, Prentice-Hall, 1982. M. D. Levine, Vision in Man and Machine, McGraw?-Hill, 1995. R. Jain, R. Kasturi, and B. G. Schunck, Machine Vision, McGraw?-Hill, 1995. C. Watkins, A. Sadun, and S. S. Marenka, Modern Image Processing: Warping, Morphing, and Classical Techniques, Academic Press, 1993. H. R. Myer and A. R. Weeks, The Pocket Handbook of Image Processing Algorithms in C, Prentice-Hall, 1993. S. E. Umbaugh, Computer Vision and Image Processing: a practical approach using CVIPtools, Prentice Hall PTR, 1998.

Required software and/or hardware

Monash Image Library

MATLAB

Equipment and consumables required or provided

Students studying off-campus are required to have the minimum system configuration specified by the Faculty as a condition of accepting admission, and regular Internet access. On-campus students, and those studying at supported study locations may use the facilities available in the computing labs. Information about computer use for students is available from the ITS Student Resource Guide in the Monash University Handbook. You will need to allocate up to 6 hours per week for use of a computer, including time for newsgroups/discussion groups.

Study resources

Study resources we will provide for your study are:

Assessment

Overview

Examination (3 hours): 70%; In-semester assessment: 30%

Faculty assessment policy

To pass a unit which includes an examination as part of the assessment a student must obtain:

- 40% or more in the unit's examination, and
- 40% or more in the unit's total non-examination assessment, and
- an overall unit mark of 50% or more.

If a student does not achieve 40% or more in the unit examination or the unit non-examination total assessment, and the total mark for the unit is greater than 50% then a mark of no greater than 49-N will be recorded for the unit.

To pass this unit, a student must obtain:

- * 40% or more in the unit's examination,
- * 40% or more in the unit's non-examination assessment, and
- * an overall unit mark of 50% or more.

If a student does not achieve 40% or more in the unit examination or the unit non-examination assessment then a mark of no greater than 49-N will be recorded for the unit.

Assignment tasks

Assignment coversheets

Assignment coversheets are available via "Student Forms" on the Faculty website: http://www.infotech.monash.edu.au/resources/student/forms/

You MUST submit a completed coversheet with all assignments, ensuring that the plagiarism declaration section is signed.

Assignment submission and return procedures, and assessment criteria will be specified with each assignment.

Assignment submission and preparation requirements will be detailed in each assignment specification. Submission must be made by the due date otherwise penalties will be enforced. You must negotiate any extensions formally with your campus unit leader via the in-semester special consideration process: http://www.infotech.monash.edu.au/resources/student/equity/special-consideration.html.

Assignment task 1

Title:

Assignment 1

Description:

Programming and Analysis for Image Processing Tasks

Weighting:

10%

Criteria for assessment:

Due date:

26 August 2010

Assignment task 2

Title:

Assignment 2

Description:

Programming and Analysis for Image Processing Tasks

Weighting:

20%

Criteria for assessment:

Due date:

14 October 2010

Examination

Weighting:

70%

Length:

3 hours

Type (open/closed book):

Closed book

Electronic devices allowed in the exam:

None

See Appendix for End of semester special consideration / deferred exams process.

Due dates and extensions

Please make every effort to submit work by the due dates. It is your responsibility to structure your study program around assignment deadlines, family, work and other commitments. Factors such as normal work pressures, vacations, etc. are not regarded as appropriate reasons for granting extensions. Students are advised to NOT assume that granting of an extension is a matter of course.

Students requesting an extension for any assessment during semester (eg. Assignments, tests or presentations) are required to submit a Special Consideration application form (in-semester exam/assessment task), along with original copies of supporting documentation, directly to their lecturer within two working days before the assessment submission deadline. Lecturers will provide specific outcomes directly to students via email within 2 working days. The lecturer reserves the right to refuse late applications.

A copy of the email or other written communication of an extension must be attached to the assignment submission.

Refer to the Faculty Special consideration webpage or further details and to access application forms: http://www.infotech.monash.edu.au/resources/student/equity/special-consideration.html

Late assignment

Assignments received after the due date will be subject to a penalty of 10% per day including weekends. Assignments received later than one week (seven days) after the due date will not normally be accepted.

Return dates

Students can expect assignments to be returned within two weeks of the submission date or after receipt, whichever is later.

Feedback

Types of feedback you can expect to receive in this unit are:

Informal feedback on progress in labs/tutes

Graded assignments with comments

Appendix

Please visit the following URL: http://www.infotech.monash.edu.au/units/appendix.html for further information about:

- Continuous improvement
- Unit evaluations
- Communication, participation and feedback
- Library access
