# **FIT3020 Information visualisation - Semester 2, 2011**

With the increasing amount of data available, it is important to be able to represent large collections from a wide range of domains in forms that more readily convey embedded information. The human sense of vision is a powerful tool for pattern recognition - this sense can be harnessed via multimedia interactive presentations. This unit will examine the fundamental principles of information visualisation and the range of tools and methods which are available to represent large data sets. These techniques can be applied across a wide range of fields including geographical, medical, statistical and scientific visualisation. The unit will examine in detail the visualisation of geospatial data in GIS (Geographic Information Systems).

## **Mode of Delivery**

Berwick (Day)

## **Contact Hours**

2 hrs lectures/wk, 2 hrs laboratories/wk

## **Workload**

You are expected to spend 12 hours per week on various activities including reading, communication with other students and unit lecturers, and preparation for learning tasks and formal assessments.

## **Unit Relationships**

### **Prerequisites**

Completion of 12 points at level 2 from FIT

### **Chief Examiner**

Mr Matthew Butler

### **Campus Lecturer**

### **Berwick**

Matthew Butler

Contact hours: See the unit website for consultation details

### **Tutors**

## **Berwick**

**Matthew Butler**

Contact hours: See the unit website for consultation details

# Academic Overview

## Learning Objectives

At the completion of this unit students will have -  
A theoretical and conceptual understanding of:

- the basic concepts of human visual perception and its impact on cognition;
- the functions of visualisation with respect to amplifying cognition;
- the properties of data and the rules for mapping data to images;
- the role of factors such as pattern, space, color, interactivity and animation in visualisation;
- the range of applications to which visualisation approaches can be applied, particularly with respect to geospatial data.

Developed attitudes that enable them to:

- critically select from the range of available visualisation techniques and apply the one that is best for the domain at hand.

Developed the skills to:

- evaluate a given data set and infer valid conclusions based on a supplied visualisation;
- design and construct an appropriate type of visualisation for a given data set;
- manipulate visual variables such as color and size to optimise a visualisation;
- identify the principle components of a map and describe map projections commonly used;
- import, display and manipulate data within a Geographic Information System (GIS).

Demonstrated the teamwork skills necessary to:

- work as a member of a project team.

## Graduate Attributes

Monash prepares its graduates to be:

1. responsible and effective global citizens who:

- a. engage in an internationalised world
- b. exhibit cross-cultural competence
- c. demonstrate ethical values

critical and creative scholars who:

- a. produce innovative solutions to problems
- b. apply research skills to a range of challenges
- c. communicate perceptively and effectively

## Assessment Summary

Examination (2 hours): 40%; In-semester assessment: 60%

Assessment Task	Value	Due Date
Assignment 1 - Information Visualisation Domains and Applications	20% (presentation 5% and report 15%)	Presentation and report due Week 5 Tutorial
Assignment 2 - Information Visualisation Prototype Application	30% (proposal 5%, application submission 20% and presentation 5%)	Proposal due Week 7 Tutorial, application submission and presentation due Week 11 Tutorial
Weekly Contribution to Discussion	10% (overall for the whole semester)	Ongoing. Comments are expected to be made weekly.
Examination 1	40%	To be advised

## Teaching Approach

### Lecture and tutorials or problem classes

This teaching and learning approach provides facilitated learning, practical exploration and peer learning. Both lectures and tutorial classes will rely heavily on student participation in the discussion of information visualisation principles and case studies.

## Feedback

### Our feedback to You

Types of feedback you can expect to receive in this unit are:

- Informal feedback on progress in labs/tutes
- Graded assignments with comments
- Solutions to tutes, labs and assignments

### Your feedback to Us

Monash is committed to excellence in education and regularly seeks feedback from students, employers and staff. One of the key formal ways students have to provide feedback is through SETU, Student Evaluation of Teacher and Unit. The University's student evaluation policy requires that every unit is evaluated each year. Students are strongly encouraged to complete the surveys. The feedback is anonymous and provides the Faculty with evidence of aspects that students are satisfied and areas for improvement.

For more information on Monash's educational strategy, and on student evaluations, see:

<http://www.monash.edu.au/about/monash-directions/directions.html>

<http://www.policy.monash.edu/policy-bank/academic/education/quality/student-evaluation-policy.html>

## **Previous Student Evaluations of this unit**

If you wish to view how previous students rated this unit, please go to <https://emuapps.monash.edu.au/unitevaluations/index.jsp>

## **Recommended Resources**

While the unit does not focus on particular technologies, several technologies will be discussed and used for the creation of visualisations. Two key software resources are Google Sketchup (<http://sketchup.google.com/intl/en/>) and Google Earth (<http://www.google.com/earth/index.html>).

## Unit Schedule

Week	Activities	Assessment
0		No formal assessment or activities are undertaken in week 0
1	Information Visualisation Introduction: A History of Information Visualisation, and an Information Visualisation Primer	
2	Tufte's Design Principles, Visual Design Principles	
3	Types of Data: Quantitative, Qualitative, and Links Between Data Sets	
4	Information Visualisation Techniques 1: Data Ink, Chart Junk and Aesthetics	
5	Information Visualisation Techniques 2: Colour, Layering and Separation	Assignment 1 - Info Vis Analysis Report and Presentation due Week 5 Tutorial
6	Information Visualisation Techniques 3: Micro/Macro readings, and Small Multiples	
7	Information Visualisation Techniques 4: Narratives, and Misleading with Data	Assignment 2 - Initial Proposal due Week 7 Tutorial
8	Domains and Case Studies 1: Physical Sciences	
9	Domains and Case Studies 2: Social Sciences	
10	Domains and Case Studies 3: Maps and GIS	
11	In Class Presentations of Visualisation Projects	Assignment 2 - Info Vis Application and Presentation due Week 11 Tutorial
12	Exam Revision	
	SWOT VAC	No formal assessment is undertaken SWOT VAC
	Examination period	LINK to Assessment Policy: <a href="http://policy.monash.edu.au/policy-bank/academic/education/assessment/assessment-in-coursework-policy.html">http://policy.monash.edu.au/policy-bank/academic/education/assessment/assessment-in-coursework-policy.html</a>

\*Unit Schedule details will be maintained and communicated to you via your MUSO (Blackboard or Moodle) learning system.

# Assessment Requirements

## Assessment Policy

To pass a unit which includes an examination as part of the assessment a student must obtain:

- 40% or more in the unit's examination, and
- 40% or more in the unit's total non-examination assessment, and
- an overall unit mark of 50% or more.

If a student does not achieve 40% or more in the unit examination or the unit non-examination total assessment, and the total mark for the unit is greater than 50% then a mark of no greater than 49-N will be recorded for the unit

## Assessment Tasks

### Participation

- **Assessment task 1**

**Title:**

Assignment 1 - Information Visualisation Domains and Applications

**Description:**

In this assignment you are to write a research report of 2000 words, accompanied with referenced images, on an information visualisation application domain area of your choice. Examples will be provided in the formal assignment brief.

Your report should provide insight into the information needs of the domain, and the data available. The report should then address the way in which the visualisation translates the information into a comprehensible form and how it achieves this end using either novel or more established visualisation techniques.

This report will form the basis for a short 5-10 minute presentation to the class in week 5 that illustrates your key findings.

A full brief, including examples, will be provided on the unit website, as will detailed assessment criteria.

**Weighting:**

20% (presentation 5% and report 15%)

**Criteria for assessment:**

Students will be assessed on a number of criteria:

- ◆ Quality of research
- ◆ Analysis and synthesis of material
- ◆ Consistency in format and presentation
- ◆ Writing style
- ◆ Bibliography and referencing

Further detail on the assessment criteria is available on the assignment specification.

**Due date:**

Presentation and report due Week 5 Tutorial

## • Assessment task 2

**Title:**

Assignment 2 - Information Visualisation Prototype Application

**Description:**

In this assignment, you are to build an information visualisation prototype application that allows basic visual manipulation of a data set.

A series of key objectives will be presented in the assignment brief, however the core data set and domain that is the focus of the developed information visualisation is negotiated between lecturer and student. The visualisation will be expected to meet key criteria such as interactivity, insight into data difficult to obtain without the use of info vis techniques, domain specific purpose, and innovation.

Students will be required to present their working prototype to the class in week 11 in a short presentation of 5-10 minutes.

A full brief, including examples, will be provided on the unit website, as will detailed assessment criteria.

**Weighting:**

30% (proposal 5%, application submission 20% and presentation 5%)

**Criteria for assessment:**

Students will be assessed on a number of criteria:

- ◆ The prototype application being well suited to the chosen domain
- ◆ Clear purpose for the visualisation
- ◆ Good application of design principles discussed throughout the semester
- ◆ Good and accurate use of domain data
- ◆ Demonstration of sound HCI principles in the interaction design
- ◆ Innovative approach to the visualisation

**Due date:**

Proposal due Week 7 Tutorial, application submission and presentation due Week 11 Tutorial

## • Assessment task 3

**Title:**

Weekly Contribution to Discussion

**Description:**

All students will be expected to contribute to online discussion of information visualisation examples. Each week an example information visualisation will be presented along with a number of key discussion questions. Students will be expected to provide small insights each week to demonstrate their understanding of the relevant information visualisation techniques. Comments will be considered on criteria such as quality of insight, relating back to discussed info vis theories, and critiques of success.

A full description will be provided on the unit website, as will detailed assessment criteria.

**Weighting:**

10% (overall for the whole semester)

**Criteria for assessment:**

Students will be assessed on a number of criteria:

- ◆ Application of Information Visualisation principles
- ◆ Quality of the critical analysis conducted

## Assessment Requirements

- ◆ Responding to other students comments in a constructive manner
- ◆ Frequency of contributions

Full details will be posted on the unit website.

**Due date:**

Ongoing. Comments are expected to be made weekly.

## Examinations

### • Examination 1

**Weighting:**

40%

**Length:**

2 hours

**Type (open/closed book):**

Closed book

**Electronic devices allowed in the exam:**

None

## Assignment submission

It is a University requirement

(<http://www.policy.monash.edu/policy-bank/academic/education/conduct/plagiarism-procedures.html>) for students to submit an assignment coversheet for each assessment item. Faculty Assignment coversheets can be found at <http://www.infotech.monash.edu.au/resources/student/forms/>. Please check with your Lecturer on the submission method for your assignment coversheet (e.g. attach a file to the online assignment submission, hand-in a hard copy, or use an online quiz).

## Extensions and penalties

Submission must be made by the due date otherwise penalties will be enforced.

You must negotiate any extensions formally with your campus unit leader via the in-semester special consideration process:

<http://www.infotech.monash.edu.au/resources/student/equity/special-consideration.html>.

## Returning assignments

Students can expect assignments to be returned within two weeks of the submission date or after receipt, whichever is later

## Other Information

### Policies

Monash has educational policies, procedures and guidelines, which are designed to ensure that staff and students are aware of the University's academic standards, and to provide advice on how they might uphold them. You can find Monash's Education Policies at:

<http://policy.monash.edu.au/policy-bank/academic/education/index.html>

Key educational policies include:

- Plagiarism  
(<http://www.policy.monash.edu/policy-bank/academic/education/conduct/plagiarism-policy.html>)
- Assessment  
(<http://www.policy.monash.edu/policy-bank/academic/education/assessment/assessment-in-coursework-p>)
- Special Consideration  
(<http://www.policy.monash.edu/policy-bank/academic/education/assessment/special-consideration-policy.h>)
- Grading Scale  
(<http://www.policy.monash.edu/policy-bank/academic/education/assessment/grading-scale-policy.html>)
- Discipline: Student Policy  
(<http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-discipline-policy.html>)
- Academic Calendar and Semesters (<http://www.monash.edu.au/students/key-dates/>);
- Orientation and Transition (<http://www.infotech.monash.edu.au/resources/student/orientation/>);  
and
- Academic and Administrative Complaints and Grievances Policy  
(<http://www.policy.monash.edu/policy-bank/academic/education/management/complaints-grievance-policy>)
- Codes of Practice for Teaching and Learning  
(<http://www.policy.monash.edu.au/policy-bank/academic/education/conduct/suppdocs/code-of-practice-tea>)

### Student services

The University provides many different kinds of support services for you. Contact your tutor if you need advice and see the range of services available at [www.monash.edu.au/students](http://www.monash.edu.au/students). The Monash University Library provides a range of services and resources that enable you to save time and be more effective in your learning and research. Go to <http://www.lib.monash.edu.au> or the library tab in my.monash portal for more information. Students who have a disability or medical condition are welcome to contact the Disability Liaison Unit to discuss academic support services. Disability Liaison Officers (DLOs) visit all Victorian campuses on a regular basis

- Website: <http://adm.monash.edu/sss/equity-diversity/disability-liaison/index.html>;
- Telephone: 03 9905 5704 to book an appointment with a DLO;
- Email: [dlu@monash.edu](mailto:dlu@monash.edu)
- Drop In: Equity and Diversity Centre, Level 1 Gallery Building (Building 55), Monash University, Clayton Campus.

### Reading List

There are no mandatory text books for this unit, however the following texts provide a valuable resource to your study:

**Key recommended texts:**

Other Information

Tufte, E. R. (1990). Envisioning information, Cheshire, Connecticut, Graphics Press

***Supplementary recommended texts:***

Chen, C. (2004). Information visualization: Beyond the horizon (2 ed.). London: Springer-Verlag.

**\*Electronic Resource**

Dykes, J., Dykes, MacEachren, A.M. and Kraak M. J. (2005), Exploring Geovisualization, Elsevier

**\*Electronic Resource**

Suda, B. (2010), A Practical Guide to Designing with Data, Five Simple Steps

Tufte, E. R. (1997) Visual explanations : images and quantities, evidence and narrative, Cheshire, Connecticut, Graphics Press

Tufte, E. R. (2001). The Visual Display of Quantitative Information, Cheshire, Connecticut, Graphics Press

Tufte, E. R. (2006) Beautiful Evidence, Cheshire, Connecticut, Graphics Press

Ware, C. (2004). Information visualization: Perception for design (2 ed.). San Francisco: Morgan Kaufmann **\*Electronic Resource**
