FIT5151 Object-oriented business application development - Semester 1, 2012

FIT5151 will aim at capitalising on what students have learned in FIT9017 Foundations of programming (or equivalent. The unit covers more in-depth material to enable students to build business applications that follow good Software Engineering principles of maintainability, reusability and expandability. The emphasis will be on helping students acquire solid object-oriented programming knowledge and skills for building business applications. Popular object-oriented design patterns will be introduced whenever appropriate to illustrate effective design process in building larger systems.

Mode of Delivery

Gippsland (Off-campus)

Contact Hours

2 hrs lectures/wk, 2 hrs laboratories/wk

Workload

Students will be expected to spend a total of 12 hours per week during semester on this unit as follows:

For on-campus students:
Lectures: 2 hours per week
Tutorial/Lab Sessions: 2 hours per week per tutorial
and up to an additional 8 hours in some weeks for completing lab and project work, private study and revision.

Off-campus students generally do not attend lecture and tutorial sessions, however, you should plan to spend equivalent time working through the relevant resources and participating in discussion groups each week.

Unit Relationships

Prerequisites

FIT9017 or equivalent

Chief Examiner

Dr Chris Ling

Campus Lecturer
Gippsland
Dengsheng Zhang

Tutors

Gippsland
Dengsheng Zhang
Academic Overview

Outcomes

At the completion of this unit, students will have -

A knowledge and understanding of:

- how to produce well-run, well-tested and well-documented object-oriented software by following solid software engineering principles of maintainability, reusability and expandability;
- effective use of popular object-oriented design patterns in the design process of larger systems;
- how to effectively and efficiently develop object-oriented application solutions to business-related problem specifications.

Developed attitudes that enable them to:

- appreciate the responsibility of coming up with well-tested and documented programs;
- appreciate the need to maintain ethical conducts when programming by making sure the code used my program is their own or taken from a legitimate source with full acknowledgement.

Gained practical skills to:

- navigate around in an Integrated Development Environment in order to efficiently produce quality applications;
- develop good software testing strategies.

Demonstrated the communication skills necessary to:

- work in a team to come up with an integrated business software solution
explain their design and testing strategies in writing and in person through interviews.

Graduate Attributes

Monash prepares its graduates to be:

1. responsible and effective global citizens who:
   a. engage in an internationalised world
   b. exhibit cross-cultural competence
   c. demonstrate ethical values

critical and creative scholars who:

   a. produce innovative solutions to problems
   b. apply research skills to a range of challenges
   c. communicate perceptively and effectively
Assessment Summary

Examination (3 hours): 60%; In-semester assessment: 40%

Teaching Approach

Lecture and tutorials or problem classes

This teaching and learning approach provides facilitated learning, practical exploration and peer learning.

Feedback

Our feedback to You

Types of feedback you can expect to receive in this unit are:

- Informal feedback on progress in labs/tutes
- Graded assignments with comments

Your feedback to Us

Monash is committed to excellence in education and regularly seeks feedback from students, employers and staff. One of the key formal ways students have to provide feedback is through SETU, Student Evaluation of Teacher and Unit. The University’s student evaluation policy requires that every unit is evaluated each year. Students are strongly encouraged to complete the surveys. The feedback is anonymous and provides the Faculty with evidence of aspects that students are satisfied and areas for improvement.

For more information on Monash's educational strategy, and on student evaluations, see:
http://www.policy.monash.edu/policy-bank/academic/education/quality/student-evaluation-policy.html

Previous Student Evaluations of this unit

If you wish to view how previous students rated this unit, please go to

Required Resources

Please check with your lecturer before purchasing any Required Resources. Prescribed texts are available for you to borrow in the library, and prescribed software is available in student labs.

You will need access to:
Academic Overview

- Java SE 7 (download from www.sun.com)
- Firefox or Internet Explorer
- The BlueJ development IDE. (download from the BlueJ website: http://www.bluej.org/index.html)

Prescribed text(s)

Prescribed texts are available for you to borrow in the library.

*Unit Schedule details will be maintained and communicated to you via your MUSO (Blackboard or Moodle) learning system.*
Assessment Requirements

Assessment Policy

Faculty Policy - Unit Assessment Hurdles

Assessment Tasks

Participation

• Assessment task 1

  Title: Assignment 1

  Description: The design and implementation of an application employing the principles introduced in the early to mid part of the semester.

  Details will be made available in the assignment specification.

  Weighting: 20%

  Criteria for assessment: This is an individual assignment and must be entirely your own work.

  Submissions will be judged on their compliance with the stated functional requirements, code and design principles presented in the unit.

  Assessment of this assignment may subject to interview should the marker feels necessary.

  Due date: Week 7

• Assessment task 2

  Title: Assignment 2

  Description: The design and implementation of an application employing the principles introduced in the mid to later part of the semester.

  Details will be made available in the assignment specification.

  Weighting: 20%

  Criteria for assessment: This is an individual assignment and must be entirely your own work.

  Submissions will be judged on their compliance with the stated functional requirements, code and design principles presented in the unit.

  Assessment of this assignment may subject to interview should the marker feels necessary.
Assessment Requirements

Due date:
Week 12

Examinations

• Examination 1

Weighting:
60%

Length:
3 hours

Type (open/closed book):
Closed book

Electronic devices allowed in the exam:
None

Assignment submission

It is a University requirement (http://www.policy.monash.edu/policy-bank/academic/education/conduct/plagiarism-procedures.html) for students to submit an assignment coversheet for each assessment item. Faculty Assignment coversheets can be found at http://www.infotech.monash.edu.au/resources/student/forms/. Please check with your Lecturer on the submission method for your assignment coversheet (e.g. attach a file to the online assignment submission, hand-in a hard copy, or use an online quiz).

Online submission

If Electronic Submission has been approved for your unit, please submit your work via the VLE site for this unit, which you can access via links in the my.monash portal.

Extensions and penalties

Submission must be made by the due date otherwise penalties will be enforced.

Returning assignments

Students can expect assignments to be returned within two weeks of the submission date or after receipt, whichever is later.
Other Information

Policies

Monash has educational policies, procedures and guidelines, which are designed to ensure that staff and students are aware of the University’s academic standards, and to provide advice on how they might uphold them. You can find Monash’s Education Policies at: http://policy.monash.edu.au/policy-bank/academic/education/index.html

Key educational policies include:

- Plagiarism (http://www.policy.monash.edu/policy-bank/academic/education/conduct/plagiarism-policy.html)
- Special Consideration (http://www.policy.monash.edu/policy-bank/academic/education/assessment/special-consideration-policy.html)
- Grading Scale (http://www.policy.monash.edu/policy-bank/academic/education/assessment/grading-scale-policy.html)
- Discipline: Student Policy (http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-discipline-policy.html)
- Academic Calendar and Semesters (http://www.monash.edu.au/students/key-dates/);
- Orientation and Transition (http://www.infotech.monash.edu.au/resources/student/orientation/); and

Student services

The University provides many different kinds of support services for you. Contact your tutor if you need advice and see the range of services available at www.monash.edu.au/students. For Sunway see http://www.monash.edu.my/Student-services, and for South Africa see http://www.monash.ac.za/current/

The Monash University Library provides a range of services and resources that enable you to save time and be more effective in your learning and research. Go to http://www.lib.monash.edu.au or the library tab in my.monash portal for more information. At Sunway, visit the Library and Learning Commons at http://www.lib.monash.edu.my/. At South Africa visit http://www.lib.monash.ac.za/.

Academic support services may be available for students who have a disability or medical condition. Registration with the Disability Liaison Unit is required. Further information is available as follows:

- Website: http://monash.edu/equity-diversity/disability/index.html
- Email: dlu@monash.edu
- Drop In: Equity and Diversity Centre, Level 1 Gallery Building (Building 55), Monash University, Clayton Campus, or Student Community Services Department, Level 2, Building 2, Monash University, Sunway Campus
- Telephone: 03 9905 5704, or contact the Student Advisor, Student Community Services at 03 55146018 at Sunway
Reading list

The following may provide useful extra reading for this unit. Copies of these are available in the Library (on reserve, one day loan or in the normal circulation).

*Java Foundations*, Lewis, De Pasquale & Chase, (Pearson Education), 2008

*Big Java* (4th edition), Cay Horstman (John Wiley & Sons), 2010

*Java Programming - from Problem Analysis to Program Design* (3rd edition), D. S Malik (Thomson), 2008

*Absolute Java* (3rd edition), Savitch (Addison Wesley), 2008
