FIT3134 IT-based entrepreneurship - Semester 2, 2012

This unit will give students insight into how to identify, create, and pursue opportunities for IT-based products and services. These opportunities have been growing rapidly due to the steady increase in digital work flows and digital customers. Google, Facebook, YouTube, Twitter, and Flickr are well-known examples of digital entrepreneurship; there are many thousands of additional examples. Specifically, this unit includes the study of entrepreneurship, opportunity analysis, feasibility analysis, intellectual property, market research, accounting, financial management, sources of funding, business models, teamwork, and business planning. Understanding these topics will allow students to more readily identify, analyse, and develop opportunities for the creation of IT-based products and services.

Mode of Delivery

Caulfield (Day)

Contact Hours

2 hrs lectures/wk, 2 hrs tutorials/wk

Workload

Weekly workload commitments are:

- two-hour lecture/discussion (required) each week, advance preparation always required;
- two-hour tutorial (required) each week, advance preparation usually required; and
- up to an additional 8 hours per week for project work, communication with other students, group meetings (virtual or face to face), private study, and revision.

Unit Relationships

Prerequisites

FIT2002 or FIT3086 and completion of 96 points towards a degree or double degree in the Faculty of Information Technology.

Chief Examiner

Professor Michael Vitale

Campus Lecturer

Caulfield

Consultation hours: by appointment
Academic Overview

Outcomes

At the completion of this unit students will:

- be able to seek opportunities for the successful application of information technology, whether in an existing organisation or in a new enterprise;
- be able to evaluate IT-based opportunities in a purposeful and disciplined way, taking into account both opportunity and risk;
- be able to organise the pursuit of selected IT-based opportunities, including developing and managing structure, strategy, and finance;
- be able to present IT-based commercial opportunities to potential investors;
- be expected to learn and understand relevant financial and intellectual property issues, as well as technology issues;
- be exposed to the entrepreneurial point of view throughout the unit, and write a short essay on ethical concerns for entrepreneurs;
- learn how to do market research, how to create a value proposition, how to differentiate a product or service, and how to develop a go-to-market strategy;
- work in teams to carry out a significant piece of written work, and thus build practical skills in teamwork and collaboration.

Graduate Attributes

Monash prepares its graduates to be:

1. responsible and effective global citizens who:
   a. engage in an internationalised world
   b. exhibit cross-cultural competence
   c. demonstrate ethical values

critical and creative scholars who:

   a. produce innovative solutions to problems
   b. apply research skills to a range of challenges
   c. communicate perceptively and effectively

Assessment Summary

Examination (2 hours): 35%; In-semester assessment: 65%

Teaching Approach

Lecture and tutorials or problem classes

Entrepreneurship itself is an action learning experience, and effective action learners reflect on their experiences to extract useful learning. The lecturer will be a facilitator of your learning about entrepreneurship, not the source of all wisdom about entrepreneurship. Collaborative learning is more effective than competitive learning in an entrepreneurship class, because no-one (particularly not the lecturer) has all the answers.

The "lecture" sessions will actually be discussions of material that you have prepared in advance -- the so-called "flipped" approach.

There will be a guest speakers most weeks during the semester.

Feedback

Our feedback to You

Types of feedback you can expect to receive in this unit are:

- Informal feedback on progress in labs/tutes
- Quiz results
- Solutions to tutes, labs and assignments

Your feedback to Us

Monash is committed to excellence in education and regularly seeks feedback from students, employers and staff. One of the key formal ways students have to provide feedback is through SETU, Student Evaluation of Teacher and Unit. The University's student evaluation policy requires that every unit is evaluated each year. Students are strongly encouraged to complete the surveys. The feedback is anonymous and provides the Faculty with evidence of aspects that students are satisfied and areas for improvement.

For more information on Monash's educational strategy, and on student evaluations, see:
http://www.policy.monash.edu/policy-bank/academic/education/quality/student-evaluation-policy.html

Previous Student Evaluations of this unit

Feedback from 2011 indicated that a substantial majority of students were satisfied or very satisfied, and a small number of students dissatisfied or very dissatisfied. The latter group was generally unhappy with the requirement of a group project assignment or with the expectation of class attendance and participation. No changes have been made with regard to these features of the unit, which reflect the practice of entrepreneurship in the real world. This unit is not for everyone. It requires weekly
Academic Overview

preparation and participation as well as group work. If this format does not appeal to you, it would be better to take another unit.

If you wish to view how previous students rated this unit, please go to https://emuapps.monash.edu.au/unitevaluations/index.jsp

Required Resources

Please check with your lecturer before purchasing any Required Resources. Limited copies of prescribed texts are available for you to borrow in the library, and prescribed software is available in student labs.

Students must have access to the Internet, ideally via a laptop or mobile device. Students who have access to such a device should bring it to lectures and tutorials. Students who do not have such access should talk with the lecturer about an alternative approach.

Recommended Resources

The reading list, weekly plan, and other information will be posted on the Moodle site for the unit.

Recommended text(s)

Field trips

One field trip may be included; the location will be readily accessible by public transportation.

Examination material or equipment

The final exam will be open book and should be done using a laptop.

Academic Integrity - Please see the Demystifying Citing and Referencing tutorial at http://lib.monash.edu/tutorials/citing/

Assessment Tasks

Participation

• Assessment task 1

  Title: Short weekly quizzes
  Description: Students are expected to prepare for, attend, and actively participate in all classes. The purpose of the brief quiz is to assess the degree of preparation across the class so that the discussion can proceed appropriately.
  Weighting: 10%
  Criteria for assessment: There will be 12 lecture/discussions, beginning in the first week of the semester. There will be brief quizzes at the start of each class except the first and the last. For each quiz, students will receive one mark for answering the majority of questions correctly, one-half mark for taking the quiz but not answering the majority of questions correctly, and no marks for not taking the quiz.
  Due date: Weekly (Week 2 to Week 11)
  Remarks: The quiz will generally be given at the beginning of class, and students arriving more than 10 minutes late are likely to miss the quiz.

• Assessment task 2

  Title: Preparation of guest speaker notes or video
  Description: Working in teams, students will prepare notes or a highlights video from each guest speaker and submit the notes for distribution via Moodle. Each student will work on the notes or video for one talk during the semester. A roster of teams, showing the talk for which each team is responsible, will be distributed early in the semester.
  Weighting: 5%
  Criteria for assessment: Guest talks are on Monday afternoons; notes or videos should be submitted to the lecturer by 5pm on the following Wednesday. One mark will be deducted if the notes are not submitted until 5pm Thursday, another mark for 5pm Friday, etc. The lecturer will not modify the notes or videos but will assess them for accuracy, completeness, and
usefulness. All members of a given team will receive the same marks, unless a member is not present for the talk, in which case s/he will receive zero marks for this assignment. Individuals who were present but who are said by all other members of the team not to have contributed to the creation of the notes or video will be offered an opportunity to present their side of the story, but may receive fewer marks than the remainder of the team.

**Due date:**
Once-off submission (to be advised by roster)

**Remarks:**
In the same way that notes are not meant to be a word-for-word transcript of what the speaker said, the highlights video is not meant to be simply a complete record of the presentation. Rather, it is meant to be edited down to a relatively brief "highlights reel" showing the most significant points from the talk. The video should include the introduction of the speaker, to provide context, and portions of the question and answer session after the talk if appropriate.

• **Assessment task 3**

**Title:**
Presentation of plan and prototype

**Description:**
Each team will give two presentations regarding its plan and prototype for a proposed IT-based start-up company. The first presentation is a progress report mid-way through the semester, and the second presentation is on the last day of class. The progress report should be no longer than five minutes and should be targeted at other members of the class. The final presentation should be no longer than 15 minutes, and should be targeted at potential collaborators or investors. Formats for the presentations will be discussed in advance.

**Weighting:**
15% total (5% for progress report, 10% for final presentation)

**Criteria for assessment:**
The progress report and final presentation will be assessed on:

♦ presentation style (25%)
♦ visual aids (15%)
♦ clarity and completeness of description (30%)
♦ viability of proposed business (30%)

Assessment will include peer reviews and lecturer observation in order to assess different contributions of group members.

**Due date:**
Progress report due 3 September 2012 in class; Final presentation due 15 October 2012 in class

• **Assessment task 4**

**Title:**
Plan and prototype for a proposed IT-based start-up business

**Description:**
The plan is intended to be a general planning and funding document for an IT-based start-up business. The plan should describe the market need, the proposed product/service, the product-market fit, the business model, the competition, the proposed metrics, the customer discovery and validation that have been carried out, and the cash flow projections for a start-up IT based company.
We will adopt the "lean startup model" approach to IT-based entrepreneurship. A lean startup launches as quickly as possible with a "minimum viable product" (MVP), a product that includes just enough features to allow useful feedback from early adopters and ideally some cash flow as well. This approach makes it easier for the company to get to market with subsequent customer-driven versions of the product, and reduces the likelihood of a company wasting time on features that nobody wants. In addition to the plan, teams should prepare a prototype that illustrates the MVP that they plan to launch (or have already launched).

This assessment task will be done by teams of three students. Students will select their own teams no later than the start of week four.

**Weighting:**
35%

**Criteria for assessment:**
The plan will be assessed based on:

- executive summary and overview (10%)
- analysis of market need and market-product fit (20%)
- customer discovery and customer validation (20%)
- business model (20%)
- competitor analysis (10%)
- proposed metrics (10%)
- projections of cash flow and funds required (10%)

The prototype is intended to illustrate key concepts and features. It will be assessed on the degree to which it serves as the basis for future development of the company.

Assessment will include peer reviews and lecturer observation in order to assess different contributions of group members.

**Due date:**
29 October 2012 midday in hard copy and via Moodle

**Remarks:**
Student teams should submit both a hard copy and an electronic copy (in Word). Elaborate bindings and formats are not required.

**Examinations**

- **Examination 1**

  **Weighting:**
  35%

  **Length:**
  2 hours

  **Type (open/closed book):**
  Open book

  **Electronic devices allowed in the exam:**
  None

  **Remarks:**
  The examination will consist of an evaluation of a case study about an IT-based start-up business. A practice exam will be done as an unassessed assignment in Week 11.
Assignment submission

It is a University requirement (http://www.policy.monash.edu/policy-bank/academic/education/conduct/plagiarism-procedures.html) for students to submit an assignment coversheet for each assessment item. Faculty Assignment coversheets can be found at http://www.infotech.monash.edu.au/resources/student/forms/. Please check with your Lecturer on the submission method for your assignment coversheet (e.g. attach a file to the online assignment submission, hand-in a hard copy, or use an online quiz).

Online submission

If Electronic Submission has been approved for your unit, please submit your work via the VLE site for this unit, which you can access via links in the my.monash portal.

Extensions and penalties

Submission must be made by the due date otherwise penalties will be enforced.

Returning assignments

Students can expect assignments to be returned within two weeks of the submission date or after receipt, whichever is later.

Resubmission of assignments

Due to their interactive and time-limited nature, assignments may not be resubmitted. However, the assignments are designed to provide feedback that will be useful in completing the business plan and passing the written final examination.
Other Information

Policies

Monash has educational policies, procedures and guidelines, which are designed to ensure that staff and students are aware of the University’s academic standards, and to provide advice on how they might uphold them. You can find Monash's Education Policies at: http://policy.monash.edu.au/policy-bank/academic/education/index.html

Key educational policies include:

- Plagiarism (http://www.policy.monash.edu/policy-bank/academic/education/conduct/plagiarism-policy.html)
- Special Consideration (http://www.policy.monash.edu/policy-bank/academic/education/assessment/special-consideration-policy.html)
- Grading Scale (http://www.policy.monash.edu/policy-bank/academic/education/assessment/grading-scale-policy.html)
- Discipline: Student Policy (http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-discipline-policy.html)
- Academic Calendar and Semesters (http://www.monash.edu.au/students/key-dates/)
- Orientation and Transition (http://www.infotech.monash.edu.au/resources/student/orientation/)
- Codes of Practice for Teaching and Learning (http://www.policy.monash.edu/policy-bank/academic/education/conduct/suppdocs/code-of-practice-teaching-learning.html)

Student services

The University provides many different kinds of support services for you. Contact your tutor if you need advice and see the range of services available at www.monash.edu.au/students. For Sunway see http://www.monash.edu.my/Student-services, and for South Africa see http://www.monash.ac.za/current/

The Monash University Library provides a range of services and resources that enable you to save time and be more effective in your learning and research. Go to http://www.lib.monash.edu.au or the library tab in my.monash portal for more information. At Sunway, visit the Library and Learning Commons at http://www.lib.monash.edu.my/. At South Africa visit http://www.lib.monash.ac.za/.

Academic support services may be available for students who have a disability or medical condition. Registration with the Disability Liaison Unit is required. Further information is available as follows:

- Website: http://monash.edu/equity-diversity/disability/index.html
- Email: dlu@monash.edu
- Drop In: Equity and Diversity Centre, Level 1 Gallery Building (Building 55), Monash University, Clayton Campus, or Student Community Services Department, Level 2, Building 2, Monash University, Sunway Campus
- Telephone: 03 9905 5704, or contact the Student Advisor, Student Community Services at 03 55146018 at Sunway
This is still a relatively new unit, and in 2012 there will be further experimentation with a "flipped" lecture approach -- students will prepare before class and do "homework" in class. Class members who believe that learning is most effective when reading about a topic or listening to a lecture should be willing to experiment with an alternative learning style, which is based on listening to other class members and to experienced entrepreneurs, and reflecting on their views. Feedback on how effectively you are learning in the unit will be of great benefit to the lecturer, and students should not hesitate to provide feedback on "what is working" and "what is not working" -- it may well be possible to improve things while the unit is in flight. In addition, reciprocal feedback is helpful to the lecturer, because it engages us all in the process of improving the learning experience.
