FIT2069 Computer architecture - Semester 1, 2013

This unit covers the internal mechanism of computers and how they are organised and programmed. Topics include combinatorial and sequential logic, Boolean Algebra, Karnaugh maps, counters, ripple adders, tree adders, memory/addressing, busses, speed, DMA, data representation, machine arithmetic, microprogramming, caches and cache architectures, virtual memory and translation look-aside buffers, vectored interrupts, polled interrupts, pipelined architecture, superscalar architecture, data dependency, hazards, CISC, RISC, VLIW machine architectures.

Mode of Delivery

Clayton (Day)

Contact Hours

2 hrs lectures/wk, 3 hr laboratory/fortnight, 2 hr tutorial/fortnight

Workload requirements

- Lectures: 2 hrs per week
- Laboratory: 3 hrs per fortnight
- Tutorial: 2 hrs per fortnight

This is a technically oriented unit where content in any given week depends strongly on content in preceding weeks. Therefore students should plan and commit a minimum of 8 to 12 hours for personal study every week and should allocate up to 5 hours per week in some weeks for use of a computer. Laboratory work will require preparation before attendance.

The unit content requires a strong focus on understanding content through the semester.

Unit Relationships

Prerequisites

FIT1031 or FIT1001 and FIT1008 or FIT1015

Chief Examiner

Dr Carlo Kopp

Campus Lecturer

Clayton

Dr Carlo Kopp

Consultation hours: By appointment
Academic Overview

Learning Outcomes

At the completion of this unit students will have:

- A knowledge and understanding of:
  - combinatorial and sequential logic, Boolean Algebra, Karnaugh maps, and hazards;
  - counters, ripple adders, tree adders, memory/addressing, computer busses, logic and bus speed, and Direct Memory Access;
  - data representation for integers and floating point operands;
  - machine arithmetic, microprogramming;
  - storage hierarchies, caches and cache architectures, performance impact of caching;
  - virtual memory and translation look-aside buffers, performance impact of TLB caching;
  - vectored and polled interrupt handling;
  - pipelined architecture, superscalar architecture, data dependency, and hazards;
  - CISC, RISC, VLIW machine architectures.

Developed the skills to:

- model combinatorial and sequential logic circuits using a simulator tool;
- perform programming tasks in assembly code.
Unit Schedule

Teaching Approach

- **Lecture and tutorials or problem classes**
  This teaching and learning approach provides facilitated learning, practical exploration and peer learning.
- **Laboratory-based classes**
  This teaching approach is practical learning.
Assessment Requirements

Assessment Policy

Faculty Policy - Unit Assessment Hurdles

Academic Integrity - Please see the Demystifying Citing and Referencing tutorial at http://lib.monash.edu/tutorials/citing/

Assessment Tasks

Participation

There are 6 Tutorial Exercises each worth 1.667% of the total mark (assessed).

There are 6 Laboratory Exercises each worth 5% of the total mark (assessed, preparation required).

Tutorials and Laboratories are scheduled in alternating weeks.

Attendance is expected and strongly recommended. This unit is tightly integrated so if students miss a Tutorial or Laboratory they will have difficulty understanding later material.

• Assessment task 1

Title: Laboratory Exercises

Description: 6 Laboratory Exercises. Individual assessment per task. Preparation required.

Attendance is expected and strongly recommended. This unit is tightly integrated so if students miss a Laboratory they will have difficulty understanding later material.

Weighting:
Total 30% (5% each)

Criteria for assessment:
The criteria used to assess laboratory tasks are:

1. All programs must assemble and execute correctly. Evidence of testing is required.
2. Programs must meet the problem specification.
3. Assembly code should be readable and maintainable.
4. Programs should be documented.
5. All algorithms should follow the style presented in laboratory examples and be correct.
6. Logic simulator circuits must comply with the specified truth table or other functional definition.

Due date:
Weeks 2, 4, 6, 8, 10 and 12
Assessment Requirements

• Assessment task 2

Title:
Tutorial Exercises

Description:
6 Tutorial Exercises. Individual assessment per task.

Attendance is expected and strongly recommended. This unit is tightly integrated so if students miss a Tutorial they will have difficulty understanding later material.

Weighting:
Total 10% (1.667% each)

Criteria for assessment:
The criteria used to assess submissions are:

1. Correctness and understanding - there may be more than one "right" answer in many cases. We will look for answers that reflect understanding of the underlying principles and theories.
2. Completeness - that you have answered all parts of each question.
3. Presentation - that you have presented your answers in a suitably formatted style.
4. Use of evidence and argument - you are able to explain your position by using logical argument drawing on the theory presented in the unit.

Due date:
Weeks 1, 3, 5, 7, 9 and 11

Examinations

• Examination 1

Weighting:
60%

Length:
3 hours

Type (open/closed book):
Closed book

Electronic devices allowed in the exam:
Non-programmable scientific calculators will be permitted.

Learning resources

Monash Library Unit Reading List
http://readinglists.lib.monash.edu/index.html

Feedback to you

Types of feedback you can expect to receive in this unit are:

• Informal feedback on progress in labs/tutes
• Test results and feedback
Extensions and penalties

Submission must be made by the due date otherwise penalties will be enforced.

You must negotiate any extensions formally with your campus unit leader via the in-semester special consideration process:

Returning assignments

Students can expect assignments to be returned within two weeks of the submission date or after receipt, whichever is later.

Assignment submission

It is a University requirement (http://www.policy.monash.edu/policy-bank/academic/education/conduct/plagiarism-procedures.html) for students to submit an assignment coversheet for each assessment item. Faculty Assignment coversheets can be found at http://www.infotech.monash.edu.au/resources/student/forms/. Please check with your Lecturer on the submission method for your assignment coversheet (e.g. attach a file to the online assignment submission, hand-in a hard copy, or use an online quiz).

Online submission

If Electronic Submission has been approved for your unit, please submit your work via the learning system for this unit, which you can access via links in the my.monash portal.

Recommended Resources

Software:

Logisim software (free)

Xspim/Spim software (free)

Supplementary Reading:

Recommended text(s)

Assessment Requirements

**Examination material or equipment**

Non-programmable scientific calculators will be permitted.
Other Information

Policies

Monash has educational policies, procedures and guidelines, which are designed to ensure that staff and students are aware of the University’s academic standards, and to provide advice on how they might uphold them. You can find Monash’s Education Policies at:  

Key educational policies include:

- Plagiarism;  
  http://www.policy.monash.edu/policy-bank/academic/education/conduct/plagiarism-policy.html
- Assessment in Coursework Programs;  
- Special Consideration;  
  http://www.policy.monash.edu/policy-bank/academic/education/assessment/special-consideration-policy.html
- Grading Scale;  
  http://www.policy.monash.edu/policy-bank/academic/education/assessment/grading-scale-policy.html
- Discipline: Student Policy;  
  http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-discipline-policy.html
- Academic Calendar and Semesters; http://www.monash.edu.au/students/dates/  
- Orientation and Transition; http://intranet.monash.edu.au/infotech/resources/students/orientation/  
- Academic and Administrative Complaints and Grievances Policy;  
  http://www.policy.monash.edu/policy-bank/academic/education/management/complaints-grievance-policy.html
- Code of Practice for Teaching and Learning;  

Graduate Attributes Policy

http://www.policy.monash.edu/policy-bank/academic/education/management/monash-graduate-attributes-policy.html

Student services

The University provides many different kinds of support services for you. Contact your tutor if you need advice and see the range of services available at http://www.monash.edu.au/students. For Sunway see http://www.monash.edu.my/Student-services, and for South Africa see http://www.monash.ac.za/current/.

Monash University Library

The Monash University Library provides a range of services, resources and programs that enable you to save time and be more effective in your learning and research. Go to www.lib.monash.edu.au or the library tab in my.monash portal for more information. At Sunway, visit the Library and Learning Commons at http://www.lib.monash.edu.my/. At South Africa visit http://www.lib.monash.ac.za/.
Disability Liaison Unit

Students who have a disability or medical condition are welcome to contact the Disability Liaison Unit to discuss academic support services. Disability Liaison Officers (DLOs) visit all Victorian campuses on a regular basis.

Website: http://www.monash.edu/equity-diversity/disability/index.html
Telephone: 03 9905 5704 to book an appointment with a DLO; or contact the Student Advisor, Student Community Services at 03 55146018 at Sunway
Email: dlu@monash.edu
Drop In: Equity and Diversity Centre, Level 1, Building 55, Clayton Campus, or Student Community Services Department, Level 2, Building 2, Monash University, Sunway Campus

Your feedback to Us

Monash is committed to excellence in education and regularly seeks feedback from students, employers and staff. One of the key formal ways students have to provide feedback is through the Student Evaluation of Teaching and Units (SETU) survey. The University’s student evaluation policy requires that every unit is evaluated each year. Students are strongly encouraged to complete the surveys. The feedback is anonymous and provides the Faculty with evidence of aspects that students are satisfied and areas for improvement.

For more information on Monash’s educational strategy, see:

www.monash.edu.au/about/monash-directions and on student evaluations, see:
www.policy.monash.edu/policy-bank/academic/education/quality/student-evaluation-policy.html

Previous Student Evaluations of this Unit

Based on extensive student feedback in Semester 1, 2011, more tutorial time was requested. Fortnightly tutorials are now two hours (up from one hour).

If you wish to view how previous students rated this unit, please go to
