FIT1010 Introduction to software engineering - Semester 2, 2013

This unit provides an introduction to the discipline of Software Engineering. The emphasis is upon a broad coverage of the areas, since students will at this early stage not have adequate programming skills to tackle many of the topics in greater depth. The notion of a software system as a model or approximation of a desired system is introduced, and used as a way of describing such things as the software life cycle and its various models, programming by contract, design and testing issues, maintenance, reuse, complexity, divide and conquer strategies, metrics and measurement, project management and software legacy.

Mode of Delivery

Clayton (Day)

Contact Hours

2 hrs lectures/wk, 2 hrs laboratories/wk, 1 hr tutorial/wk

Workload requirements

Students will be expected to spend a total of 12 hours per week during semester on this unit as follows:

- two hours of lectures and
- one hour tutorial (requiring advance preparation)
- two hours laboratory (requiring advance preparation)
- a minimum of 7 hours of personal study each week inorder to satisfy the reading and assessment expectations.

Unit Relationships

Prohibitions

CSE1401

Prerequisites

FIT1002 or FIT1040

Chief Examiner

Associate Professor Ann Nicholson

Campus Lecturer
FIT1010 Introduction to software engineering - Semester 2, 2013

Clayton

Robert Merkel

Consultation hours: Monday 1pm-2pm Wednesday 11am-12pm

Tutors

Clayton

Robyn Mcnamara

Avnish Manraj

Karan Pedramrazi

Tanjila Kanij

Shimul Nath
Academic Overview

Learning Outcomes

At the completion of this unit students will have:

• an understanding of the breadth and nature of the discipline of Software Engineering;
• an understanding of the effect and implications of complexity in large software systems;
• an understanding of the issues in constructing large software systems from its components, and the nature and design of those components;
• an awareness of the responsibilities placed upon a software engineer;
• an ability to use basic modelling techniques to define and describe the behaviour of software systems;
• an understanding of common software team structures and have developed practical skills in solving small problems in teams.
## Unit Schedule

<table>
<thead>
<tr>
<th>Week</th>
<th>Activities</th>
<th>Assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>Check your tutorial and lab class enrolments.</td>
<td>No formal assessment or activities are undertaken in week 0</td>
</tr>
<tr>
<td>1</td>
<td>Introductions. Note: TUTORIALS START WEEK 1 (Monday/Tuesday)</td>
<td>Assessment task 4: Tutorial preparation and participation due weekly in tutorials (Weeks 1 to 12)</td>
</tr>
<tr>
<td>2</td>
<td>Software Lifecycles</td>
<td>Assessment task 1: Weekly Quizzes to be submitted via Moodle, closing each Monday before 10am (Weeks 2 to 12); Assessment task 2: Practical class assessments due weekly in lab classes (Weeks 2 to 12)</td>
</tr>

Teaching Approach

Lecture and tutorials or problem classes

This teaching and learning approach provides facilitated learning, practical exploration and peer learning.
Assessment Requirements

Assessment Policy

Faculty Policy - Unit Assessment Hurdles

Academic Integrity - Please see the Demystifying Citing and Referencing tutorial at
http://lib.monash.edu/tutorials/citing/

Assessment Tasks

Participation

• Assessment task 1

  Title: Weekly Quizzes
  Description: Weekly on-line multiple choice quizzes. These will be open on-line each week and must be completed before Monday 10am
  Weighting: 5%
  Criteria for assessment: Correct answers demonstrating basic knowledge and understanding of course material.
  Due date: Weekly, on-line, Monday before 10am (Weeks 2 to 12)
  Remarks: Each quiz closing on Monday will cover material from the previous week's lecture. This material will be required for the tutorial and laboratory work following the closing of the quiz. The intention is that the quiz will assist students to prepare for these tutorial and lab classes.

• Assessment task 2

  Title: Practical class assessments
  Description: Range of tasks, including team exercises, software design, implementation. Some work will be assessed individually, whereas for some assessment activities, students will work in pairs.
  Weighting: 25%
  Criteria for assessment: For group work, some marks will be for the group as a whole, some for an individual's contribution; details will be specified in the assessment task description. Some tasks will be assessed in the lab class itself. When marking is done outside the lab, in most cases students must submit their work at the end of the lab class. Details will be given with each the lab class description provided each week.
  Due date: Weekly in lab classes (Weeks 2 to 12)
Assessment Requirements

• Assessment task 3

Title: Work Folio

Description: Students must produce a range of documents (text, UML diagrams, code, etc) from tutorial and laboratory class activities. These will be collected in a Google Documents folder that will form an "eFolio". A more detailed description of the requirements for the eFolio will be available on the unit Moodle site.

Weighting: 5%

Criteria for assessment:
A set of guidelines for the eFolio is provided online.
Criteria for assessing the folio are:

1. Inclusion of all specified documents (completeness)
2. Appropriateness of contents and presentation
3. Organisation

Due date: Friday, Week 12

• Assessment task 4

Title: Tutorial preparation and participation

Description: Students will work on individual and group based tutorial activities that in most cases align with the previous week's lecture objectives, and the lab class following the tutorial.

Weighting: 5%

Criteria for assessment:
Students will be assessed on their participation during the tutorials, such as group work on activities and contributions to discussions. They will also be expected to prepare and make presentations to the class at various times during the semester, which will contribute to this assessment.

Due date: Weekly in tutorials (Weeks 1 to 12)

Examinations

• Examination 1

Weighting: 60%

Length: 3 hours

Type (open/closed book): Open book

Electronic devices allowed in the exam: None
Learning resources

Reading list

Recommended (good general "classic" software engineering texts):

- Sommerville, Software Engineering, Addison-Wesley. (Latest edition?)

Also, for the "Ethics" topic, the reading will be Chapter 8 from

  (available electronically from the Monash library reading list:
  http://lib.monash.edu/resourcelists/f/fit1010.html

Monash Library Unit Reading List
http://readinglists.lib.monash.edu/index.html

Feedback to you

Types of feedback you can expect to receive in this unit are:

- Informal feedback on progress in labs/tutes
- Graded assignments with comments
- Graded assignments without comments
- Quiz results
- Solutions to tutes, labs and assignments

Extensions and penalties

Submission must be made by the due date otherwise penalties will be enforced.

You must negotiate any extensions formally with your campus unit leader via the in-semester special consideration process: http://www.monash.edu.au/exams/special-consideration.html

Returning assignments

Students can expect assignments to be returned within two weeks of the submission date or after receipt, whichever is later.

Resubmission of assignments

If students do not attend a laboratory class, they cannot submit work for that assessment later. Late or resubmissions may be permitted at the discretion of the demonstrator or lecturer, for example if there have been technical difficulties during the laboratory class.
Assignment submission

It is a University requirement (http://www.policy.monash.edu/policy-bank/academic/education/conduct/plagiarism-procedures.html) for students to submit an assignment coversheet for each assessment item. Faculty Assignment coversheets can be found at http://www.infotech.monash.edu.au/resources/student/forms/. Please check with your Lecturer on the submission method for your assignment coversheet (e.g. attach a file to the online assignment submission, hand-in a hard copy, or use an online quiz). Please note that it is your responsibility to retain copies of your assessments.

Online submission

If Electronic Submission has been approved for your unit, please submit your work via the learning system for this unit, which you can access via links in the my.monash portal.

Required Resources

Please check with your lecturer before purchasing any Required Resources. Limited copies of prescribed texts are available for you to borrow in the library, and prescribed software is available in student labs.

Prescribed text: (the lectures will follow this text quite closely, and the lecture slides from the text will be made available)

(Note: Schach’s “Object-Oriented & Classical Software Engineering”, 7th Edition and 8th Edition are very similar, and can be used in place of the 2008 “Object-oriented” version, if need be).

Recommended Resources

If you wish to work from home, instruction for installing Python and the Aptana IDE are provided.

No installation support will be provided for home installations.

Examination material or equipment

The exam will be an "open book" exam. Students may take in textbooks, any of the unit teaching material and any notes they have made themselves. More details will be provided on the unit website prior to the exam.
Other Information

Policies

Monash has educational policies, procedures and guidelines, which are designed to ensure that staff and students are aware of the University’s academic standards, and to provide advice on how they might uphold them. You can find Monash’s Education Policies at: www.policy.monash.edu.au/policy-bank/academic/education/index.html

Key educational policies include:

- Academic integrity; http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-academic-integrity-policy.html
- Special Consideration; http://www.policy.monash.edu/policy-bank/academic/education/assessment/special-consideration-policy.html
- Grading Scale; http://www.policy.monash.edu/policy-bank/academic/education/assessment/grading-scale-policy.html
- Discipline: Student Policy; http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-discipline-policy.html
- Academic Calendar and Semesters; http://www.monash.edu.au/students/dates/
- Orientation and Transition; http://intranet.monash.edu.au/infotech/resources/students/orientation/

Graduate Attributes Policy

http://www.policy.monash.edu/policy-bank/academic/education/management/monash-graduate-attributes-policy.html

Student services

The University provides many different kinds of support services for you. Contact your tutor if you need advice and see the range of services available at http://www.monash.edu.au/students. For Sunway see http://www.monash.edu.my/Student-services, and for South Africa see http://www.monash.ac.za/current/.

Monash University Library

The Monash University Library provides a range of services, resources and programs that enable you to save time and be more effective in your learning and research. Go to www.lib.monash.edu.au or the library tab in my.monash portal for more information. At Sunway, visit the Library and Learning Commons at http://www.lib.monash.edu.my/. At South Africa visit http://www.lib.monash.ac.za/.
Disability Liaison Unit

Students who have a disability or medical condition are welcome to contact the Disability Liaison Unit to discuss academic support services. Disability Liaison Officers (DLOs) visit all Victorian campuses on a regular basis.

Website: http://www.monash.edu/equity-diversity/disability/index.html
Telephone: 03 9905 5704 to book an appointment with a DLO; or contact the Student Advisor, Student Community Services at 03 55146018 at Sunway
Email: dlu@monash.edu
Drop In: Equity and Diversity Centre, Level 1, Building 55, Clayton Campus, or Student Community Services Department, Level 2, Building 2, Monash University, Sunway Campus

Your feedback to Us

Monash is committed to excellence in education and regularly seeks feedback from students, employers and staff. One of the key formal ways students have to provide feedback is through the Student Evaluation of Teaching and Units (SETU) survey. The University’s student evaluation policy requires that every unit is evaluated each year. Students are strongly encouraged to complete the surveys. The feedback is anonymous and provides the Faculty with evidence of aspects that students are satisfied and areas for improvement.

For more information on Monash’s educational strategy, see:

www.monash.edu.au/about/monash-directions and on student evaluations, see:
www.policy.monash.edu/policy-bank/academic/education/quality/student-evaluation-policy.html

Previous Student Evaluations of this Unit

This year only minor changes have been made to the unit. There will be some extra material on software testing, and some material on legal and ethical aspects will be omitted as it will be covered more comprehensively in other units.

Staff-Student Meetings: Student also have the opportunity to provide feedback during the semester via student representatives at the Clayton School of IT Staff-Student meetings. Information about who your reps are and minutes of previous meetings are available at:

If you wish to view how previous students rated this unit, please go to
