FIT4004 System validation and verification, quality and standards - Semester 1, 2014

This unit covers the fundamental products, processes and techniques for system validation and verifications including testing methodologies, static program analysis and code quality measurement and monitoring. Open-source tools will be used to apply in practice knowledge learnt about software testing from a theoretical perspective. Inspection and testing methodologies, analysis of artefacts, robustness, performance analysis configuration management, quality assurance plan and standards, compliance, assessment, certification issues are covered. It shows how to predict, analyse and control defects in complex software systems.

Mode of Delivery

Clayton (Day)

Workload Requirements

Minimum total expected workload equals 12 hours per week comprising:

(a.) Contact hours for on-campus students:

- Two hours of lectures
- One 1-hour tutorial

(b.) Additional requirements (all students):

- A minimum of 2-3 hours of personal study per one hour of contact time in order to satisfy the reading and assignment expectations.

Additional workload requirements

You will need to allocate one hour per week for unsupervised lab/tute activity in the MUSE Lab to get familiarised with tools, work on assignments and for self study.

Unit Relationships

Prohibitions

CSE4431

Prerequisites

MAT1830 and FIT2004 and FIT2024 and FIT3077

Chief Examiner

Dr Robert Merkel

Campus Lecturer

Clayton

Robert Merkel

Consultation hours: Tuesday 3-5pm, Thursday 12-1pm

Tutors

Clayton

Your feedback to Us

Monash is committed to excellence in education and regularly seeks feedback from students, employers and staff. One of the key formal ways students have to provide feedback is through the Student Evaluation of Teaching and Units (SETU) survey. The University's student evaluation policy requires that every unit is evaluated each year. Students are strongly encouraged to complete the surveys. The feedback is anonymous and provides the Faculty with evidence of aspects that students are satisfied and areas for improvement.

For more information on Monash's educational strategy, see:

www.monash.edu.au/about/monash-directions/ and on student evaluations, see:
www.policy.monash.edu/policy-bank/academic/education/quality/student-evaluation-policy.html

Previous Student Evaluations of this Unit

Previous feedback has highlighted the following strengths in this unit:

- Practical, programming based project
- Challenging and stimulating tutorials and assignment

Student feedback has also informed improvements to this unit including:

- The assignment timing and weights have been adjusted to reflect their relative difficulty level
- Practical sessions have been introduced to make tools/systems more accessible to students unfamiliar with them

If you wish to view how previous students rated this unit, please go to
<https://emuapps.monash.edu.au/unitevaluations/index.jsp>

Academic Overview

Learning Outcomes

On successful completion of this unit, students should be able to:

- explain the importance of quality assurance in software engineering;
- articulate the role of validation and verification methods in the system development life cycle; key issues in software testing, testing levels and testing techniques;
- categorise and apply selection and combination of techniques and test related measures;
- measure, evaluate and analyse software under test using different quality and complexity metrics;
- develop adequate test cases to help detect software system defects using industry-strength IDEs, unit testing frameworks such as JUnit, code coverage tools such as Cobertura, and other similar products;
- implement continuous integration (CI) at unit, integration & system testing level using a CI server such as Jenkins to automatically run regression test suites on the system under test.

Unit Schedule

Week	Activities	Assessment
0		No formal assessment or activities are undertaken in week 0
1	Overview, Fundamentals of Software Testing	
2	Mathematics for software testing & quality: set theory, graph theory, etc.	Weekly assessed tutorials start in Week 2
3	Black-box testing	Unit, Integration, System and Continuous testing - Phase 1 due Week 3
4	White-box testing I	
5	White-box testing II	
6	Component testing	
7	Software quality & metrics	Unit, Integration, System and Continuous testing - Phase 2 due Week 7
8	System testing	
9	Object-oriented testing	
10	Mutation testing	
11	A comparison of software verification and validation techniques	Unit, Integration, System and Continuous testing - Phase 3 due Week 11
12	Web testing overview	
	SWOT VAC	No formal assessment is undertaken in SWOT VAC
	Examination period	LINK to Assessment Policy: http://policy.monash.edu.au/policy-bank/academic/education/assessment/assessment-in-coursework-policy.html

*Unit Schedule details will be maintained and communicated to you via your learning system.

Teaching Approach

Lecture and tutorials or problem classes

This teaching and learning approach provides facilitated learning, practical exploration and peer learning.

Assessment Summary

Examination (2 hours): 50%; In-semester assessment: 50%

Assessment Task	Value	Due Date
Unit, Integration, System and Continuous testing - Phase 1	10%	Week 3
Unit, Integration, System and Continuous testing - Phase 2	15%	Week 7
Unit, Integration, System and Continuous testing - Phase 3	15%	Week 11
Tutorial Participation	10%	Weekly

Unit Schedule

Examination 1

50% To be advised

Assessment Requirements

Assessment Policy

Faculty Policy - Unit Assessment Hurdles

(<http://intranet.monash.edu.au/infotech/resources/staff/edgov/policies/assessment-examinations/assessment-hurdles>)

Academic Integrity - Please see resources and tutorials at

<http://www.monash.edu/library/skills/resources/tutorials/academic-integrity/>

Assessment Tasks

Participation

Students are expected to attend all tutorials and participate in active discussions. Tutorials will carry 10% assessment and will be assessed on participation.

• Assessment task 1

Title:

Unit, Integration, System and Continuous testing - Phase 1

Description:

The first phase of the semester-long project consists of two parts:

- ◆ System setup,
- ◆ Implementation as specified in the assignment specification, and
- ◆ Unit testing of the various component classes in the code base provided to and extended by you.

Weighting:

10%

Criteria for assessment:

This assignment is evaluated on the correctness and completeness of the work:

- ◆ System setup, and
 - ◇ Successful setup of the working environment on personal laptops, and
 - ◇ Successful connection to the integration server.
- ◆ Implementation
 - ◇ Completeness of the implementation.
- ◆ Unit testing
 - ◇ Developing functionality according to a given specification,
 - ◇ Successfully invoking automated builds on the server, and
 - ◇ Development of non-trivial unit tests appropriate for specified system functionality.

No written or file submission is required for this assessment. It will be based only on a demo in the tutorial and answering queries & during an interview.

Due date:

Week 3

• **Assessment task 2**

Title:

Unit, Integration, System and Continuous testing - Phase 2

Description:

The second phase of the semester-long project focuses on integration testing.

You will continue to develop the system based on a given specification and write unit tests and integration tests for the newly developed components. Such tests will also need to be automatically executed on the continuous integration server.

Weighting:

15%

Criteria for assessment:

The assignment will be assessed by its correctness and completeness.

- ◆ Sufficient functionality in the different layers of the system.
- ◆ Sufficient testing adequacy of the developed functionality.

No written or file submission is required for this assessment. It will be based only on a demo in the tutorial and answering queries & during an interview.

Due date:

Week 7

• **Assessment task 3**

Title:

Unit, Integration, System and Continuous testing - Phase 3

Description:

The third phase of the semester-long project focuses on system testing.

You will continue to develop the system based on a given specification and write unit tests, integration tests and system tests for the newly developed components. Such tests will also need to be automatically executed on the continuous integration server.

Weighting:

15%

Criteria for assessment:

The assignment will be assessed by its correctness and completeness.

- ◆ Sufficient functionality of the whole system (backend and the Web frontend).
- ◆ Sufficient testing adequacy of the components and the system.

Assessment will consist of a demo & interview in the tutorial and a short written report.

Due date:

Week 11

• **Assessment task 4**

Title:

Tutorial Participation

Description:

Assessment Requirements

Tutorials run from Week 2 through to Week 12. Questions related to lectures, assignment demos and literature reading will be conducted in tutorials.

Weighting:

10%

Criteria for assessment:

Active participation in discussions.

Due date:

Weekly

Examinations

- **Examination 1**

Weighting:

50%

Length:

2 hours

Type (open/closed book):

Open book

Electronic devices allowed in the exam:

None

Monash Library Unit Reading List (if applicable to the unit)
<http://readinglists.lib.monash.edu/index.html>

Faculty of Information Technology [Style Guide](#)

Feedback to you

Examination/other end-of-semester assessment feedback may take the form of feedback classes, provision of sample answers or other group feedback after official results have been published. Please check with your lecturer on the feedback provided and take advantage of this prior to requesting individual consultations with staff. If your unit has an examination, you may request to view your examination script booklet, see <http://intranet.monash.edu.au/infotech/resources/students/procedures/request-to-view-exam-scripts.html>

Types of feedback you can expect to receive in this unit are:

- Informal feedback on progress in labs/tutes
- Graded assignments without comments
- Solutions to tutes, labs and assignments

Extensions and penalties

Submission must be made by the due date otherwise penalties will be enforced.

You must negotiate any extensions formally with your campus unit leader via the in-semester special consideration process: <http://www.monash.edu.au/exams/special-consideration.html>

Returning assignments

Students can expect assignments to be returned within two weeks of the submission date or after receipt, whichever is later.

Assignment submission

It is a University requirement

(<http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-academic-integrity-managing-pla>) for students to submit an assignment coversheet for each assessment item. Faculty Assignment coversheets can be found at <http://www.infotech.monash.edu.au/resources/student/forms/>. Please check with your Lecturer on the submission method for your assignment coversheet (e.g. attach a file to the online assignment submission, hand-in a hard copy, or use an online quiz). Please note that it is your responsibility to retain copies of your assessments.

Online submission

If Electronic Submission has been approved for your unit, please submit your work via the learning system for this unit, which you can access via links in the my.monash portal.

Required Resources

Please check with your lecturer before purchasing any Required Resources. Limited copies of prescribed texts are available for you to borrow in the library, and prescribed software is available in student labs.

The MUSE Lab in Bldg 26/G13 is the lab used for this unit. However, students are required to install the required software on their laptops to minimise interruptions to development and testing. The required software include:

- Tools for Software testing such as JUnit 4.x (latest vers)
- Java build management Apache Maven 2.x or 3.x
- The version control system Subversion
- An open source or commercial Java IDE (Eclipse, NetBeans or IntelliJ IDEA)

Software may be:

- Downloaded from:
 - ◆ <http://www.eclipse.org/downloads/>
 - ◆ <http://www.jetbrains.com/idea/download/>
 - ◆ <http://tortoisesvn.net/downloads.html>
 - ◆ <http://maven.apache.org/download.html>
- A free classroom license for IntelliJ IDEA will be provided via Moodle

Recommended Resources

Students are encouraged to use their own laptops to work on project assignments. All required software can be downloaded and installed onto personal laptops.

Recommended text(s)

Other Information

Policies

Monash has educational policies, procedures and guidelines, which are designed to ensure that staff and students are aware of the University's academic standards, and to provide advice on how they might uphold them. You can find Monash's Education Policies at:

www.policy.monash.edu.au/policy-bank/academic/education/index.html

Key educational policies include:

- Student Academic Integrity Policy and Student Academic Integrity: Managing Plagiarism and Collusion Procedures ;
<http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-academic-integrity-policy.html>
- Assessment in Coursework Programs;
<http://www.policy.monash.edu/policy-bank/academic/education/assessment/assessment-in-coursework-policy.html>
- Special Consideration;
<http://www.policy.monash.edu/policy-bank/academic/education/assessment/special-consideration-policy.html>
- Grading Scale;
<http://www.policy.monash.edu/policy-bank/academic/education/assessment/grading-scale-policy.html>
- Discipline: Student Policy;
<http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-discipline-policy.html>
- Academic Calendar and Semesters; <http://www.monash.edu.au/students/dates/>
- Orientation and Transition; <http://intranet.monash.edu.au/infotech/resources/students/orientation/>
- Academic and Administrative Complaints and Grievances Policy;
<http://www.policy.monash.edu/policy-bank/academic/education/management/complaints-grievance-policy.html>

Faculty resources and policies

Important student resources including Faculty policies are located at

<http://intranet.monash.edu.au/infotech/resources/students/>

Graduate Attributes Policy

<http://www.policy.monash.edu/policy-bank/academic/education/management/monash-graduate-attributes-policy.html>

Student Charter

www.opq.monash.edu.au/ep/student-charter/monash-university-student-charter.html

Student services

The University provides many different kinds of support services for you. Contact your tutor if you need advice and see the range of services available at <http://www.monash.edu.au/students>. For Malaysia see <http://www.monash.edu.my/Student-services>, and for South Africa see <http://www.monash.ac.za/current/>.

Monash University Library

The Monash University Library provides a range of services, resources and programs that enable you to save time and be more effective in your learning and research. Go to www.lib.monash.edu.au or the library tab in my.monash portal for more information. At Malaysia, visit the Library and Learning Commons at <http://www.lib.monash.edu.my/>. At South Africa visit <http://www.lib.monash.ac.za/>.

Disability Liaison Unit

Students who have a disability or medical condition are welcome to contact the Disability Liaison Unit to discuss academic support services. Disability Liaison Officers (DLOs) visit all Victorian campuses on a regular basis.

- Website: <http://www.monash.edu/equity-diversity/disability/index.html>
- Telephone: 03 9905 5704 to book an appointment with a DLO; or contact the Student Advisor, Student Community Services at 03 55146018 at Malaysia
- Email: dlu@monash.edu
- Drop In: Equity and Diversity Centre, Level 1, Building 55, Clayton Campus, or Student Community Services Department, Level 2, Building 2, Monash University, Malaysia Campus
