FIT2049 Games programming with C++ - Semester 2, 2014

This unit will further develop object-oriented programming skills with the C++ language, and place them into the Games Programming context. Fundamental games programming design principles will be covered, including formal game structures and the game program loop. A number of specific games programming techniques with C++ will be also covered. These include the use of DirectX, games physics, and advanced 3D rendering, expressing these concepts through game creation using C++ and Microsoft Windows DirectX. This provides a strong grounding for further study in this area, especially related to games engine development and artificial intelligence.

Mode of Delivery
Caulfield (Day)

Workload Requirements
Minimum total expected workload equals 12 hours per week comprising:

(a.) Contact hours for on-campus students:

- Two hours of lectures
- One 2-hour laboratory

(b.) Additional requirements (all students):

- A minimum of 8 hours independent study per week for completing lab and project work, private study and revision.

Your feedback to Us

Monash is committed to excellence in education and regularly seeks feedback from students, employers and staff. One of the key formal ways students have to provide feedback is through the Student Evaluation of Teaching and Units (SETU) survey. The University's student evaluation policy requires that every unit is evaluated each year. Students are strongly encouraged to complete the surveys. The feedback is anonymous and provides the Faculty with evidence of aspects that students are satisfied and areas for improvement.

For more information on Monash's educational strategy, see:
www.monash.edu.au/about/monash-directions/ and on student evaluations, see:
www.policy.monash.edu/policy-bank/academic/education/quality/student-evaluation-policy.html

Previous Student Evaluations of this Unit

Previous feedback for this unit has highlighted strengths in its fundamental importance to the BITS (Games) major, its challenging nature, and its real world application. Several improvements were suggested from the last offering, mostly related to the nature of the lectures and that the unit may benefit from longer laboratory classes. To address this, rather than simply extend the time spent in laboratories, lectures will place more focus on demoing code examples and engaging students through code creation and participation.

If you wish to view how previous students rated this unit, please go to
Academic Overview

Learning Outcomes

At the completion of this unit students will have:

- an understanding of game entities and formal games program structures;
- an understanding of the notion of the programming game loop and how to set it up;
- a working knowledge of basic DirectX, including textures, displaying sprites, animation, text, and rendering;
- a working knowledge of physics in the games programming context, including basic movement and interaction;
- a working knowledge of Direct 3D rendering, including geometry, models, cameras, textures and lighting;
- an understanding of scene management in games;
- the ability to express these concepts in a working Microsoft Windows game prototype.

## Teaching Approach

**Lecture and tutorials or problem classes**

This teaching and learning approach provides facilitated learning, practical exploration and peer learning. Focus will be placed on practical implementation and case study in the latter stages of the semester.
**Unit Schedule**

Assessment Tasks

Participation

• Assessment task 1

  Title: Assignment 1: Simple Game Implementation

  Description: This first submission will be in the form of a simplistic 3D game. This submission will focus on refamiliarisation with C++ and computer game mathematics, designing object oriented solutions to game programming problems, as well as incorporating basic graphics and rendering.

  Weighting: 15%

  Criteria for assessment:
  Explicit assessment criteria will be provided in the assignment brief, however students will be assessed on the following broad criteria:
  ♦ Meeting functional requirements as described in the assignment description
  ♦ Demonstrating a solid understanding of C++ concepts, including good practice
  ♦ Demonstrating a solid understanding of Game Development concepts, including good practice
  ♦ Following the unit Programming Style Guide
  ♦ Creating solutions that are as efficient and extensible as possible

  Due date: 29 August 2014

• Assessment task 2

  Title: Assignment 2a: Major Game Project

  Description: This submission will form the beginnings of a major game project that will be worked upon throughout the semester. This submission will focus on setting up collision, audio, and particle systems within a game project.

  Students will be required to compile a portfolio of major laboratory tasks for submission for assessment. Details of each portfolio component are clearly indicated in the laboratory tasks for each week.

  Weighting:
Criteria for assessment:

Explicit assessment criteria will be provided in the assignment brief, however students will be assessed on the following broad criteria:

♦ Meeting functional requirements as described in the assignment description
♦ Demonstrating a solid understanding of C++ concepts, including good practice
♦ Demonstrating a solid understanding of Game Development concepts, including good practice
♦ Following the unit Programming Style Guide
♦ Creating solutions that are as efficient and extensible as possible

Due date:
26 September 2014

Assessment task 3

Title:
Assignment 2b: Major Game Project Extension and Extra Functionality

Description:
This assessment task will expand upon the second assignment, where students will add their own unique functionality to the game. Students will propose and negotiate their own extended functionality with the unit lecturer. This must consist of both demonstration of advanced programming concepts and also added game play functionality. Each student will require approval of their added functionality before commencing the assignment.

Weighting:
15%

Criteria for assessment:

Explicit assessment criteria will be provided in the assignment brief, however students will be assessed on the following broad criteria:

♦ Meeting functional requirements as described in the primary assignment description
♦ Demonstrating understanding of advanced game programming concepts and techniques
♦ Demonstrating application of game programming concepts to the development of creative game play
♦ Following the unit Programming Style Guide and good practice
♦ Creating solutions that are as efficient and extensible as possible

Due date:
24 October 2014

Examinations

• Examination 1

Weighting:
50%

Length:
3 hours

Type (open/closed book):
Closed book

Electronic devices allowed in the exam:
None
Learning resources

Monash Library Unit Reading List (if applicable to the unit)
http://readinglists.lib.monash.edu/index.html

Faculty of Information Technology Style Guide

Feedback to you

Examination/other end-of-semester assessment feedback may take the form of feedback classes, provision of sample answers or other group feedback after official results have been published. Please check with your lecturer on the feedback provided and take advantage of this prior to requesting individual consultations with staff. If your unit has an examination, you may request to view your examination script booklet, see http://intranet.monash.edu.au/infotech/resources/users/procedures/request-to-view-exam-scripts.html

Types of feedback you can expect to receive in this unit are:

- Informal feedback on progress in labs/tutes
- Graded assignments with comments
- Solutions to tutes, labs and assignments

Extensions and penalties

Submission must be made by the due date otherwise penalties will be enforced.

You must negotiate any extensions formally with your campus unit leader via the in-semester special consideration process: http://www.monash.edu.au/exams/special-consideration.html

Returning assignments

Students can expect assignments to be returned within two weeks of the submission date or after receipt, whichever is later.

Resubmission of assignments

Students may not resubmit assignments after the due date has passed.

Assignment submission

It is a University requirement (http://wwwpolicy.monash.edu/policy-bank/academic/education/conduct/student-academic-integrity-managing-plagiarism-collusion-procedures.html) for students to submit an assignment coversheet for each assessment item. Faculty Assignment coversheets can be found at http://www.infotech.monash.edu.au/resources/student/forms/. Please check with your Lecturer on the submission method for your assignment coversheet (e.g. attach a file to the online assignment submission, hand-in a hard copy, or use an online quiz). Please note that it is your responsibility to retain copies of your assessments.
Online submission

If Electronic Submission has been approved for your unit, please submit your work via the learning system for this unit, which you can access via links in the my.monash portal.

Required Resources

Please check with your lecturer before purchasing any Required Resources. Limited copies of prescribed texts are available for you to borrow in the library, and prescribed software is available in student labs.

This unit will require the use of a personal computer and a suitable IDE for Windows C++ and DirectX development. Visual Studio for Windows will be used in the laboratory environment.

Copies of the Windows operating system and Visual Studio 2010 may be obtained free of charge from http://msdnaa.monash.edu.au/fit.
The latest DirectX SDK may be obtained from the Microsoft website.
Other Information

Policies

Monash has educational policies, procedures and guidelines, which are designed to ensure that staff and students are aware of the University’s academic standards, and to provide advice on how they might uphold them. You can find Monash’s Education Policies at: www.policy.monash.edu.au/policy-bank/academic/education/index.html

Key educational policies include:

- Student Academic Integrity Policy and Student Academic Integrity: Managing Plagiarism and Collusion Procedures; http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-academic-integrity-policy.html
- Special Consideration; http://www.policy.monash.edu/policy-bank/academic/education/assessment/special-consideration-policy.html
- Grading Scale; http://www.policy.monash.edu/policy-bank/academic/education/assessment/grading-scale-policy.html
- Discipline: Student Policy; http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-discipline-policy.html
- Academic Calendar and Semesters; http://www.monash.edu.au/students/dates/
- Orientation and Transition; http://intranet.monash.edu.au/infotech/resources/students/orientation/

Faculty resources and policies

Important student resources including Faculty policies are located at http://intranet.monash.edu.au/infotech/resources/students/

Graduate Attributes Policy

http://www.policy.monash.edu/policy-bank/academic/education/management/monash-graduate-attributes-policy.html

Student Charter

Student services

The University provides many different kinds of support services for you. Contact your tutor if you need advice and see the range of services available at http://www.monash.edu.au/students. For Malaysia see http://www.monash.edu.my/Student-services, and for South Africa see http://www.monash.ac.za/current/.
Monash University Library

The Monash University Library provides a range of services, resources and programs that enable you to save time and be more effective in your learning and research. Go to www.lib.monash.edu.au or the library tab in my.monash portal for more information. At Malaysia, visit the Library and Learning Commons at http://www.lib.monash.edu.my/. At South Africa visit http://www.lib.monash.ac.za/.

Disability Liaison Unit

Students who have a disability or medical condition are welcome to contact the Disability Liaison Unit to discuss academic support services. Disability Liaison Officers (DLOs) visit all Victorian campuses on a regular basis.

- Website: http://www.monash.edu/equity-diversity/disability/index.html
- Telephone: 03 9905 5704 to book an appointment with a DLO; or contact the Student Advisor, Student Community Services at 03 55146018 at Malaysia
- Email: dlu@monash.edu
- Drop In: Equity and Diversity Centre, Level 1, Building 55, Clayton Campus, or Student Community Services Department, Level 2, Building 2, Monash University, Malaysia Campus
