FIT2076 Web-database interface - Semester 2, 2014

This unit provides students with the knowledge, understanding and skills required to develop an application system which uses a web interface to a back-end database. The unit assumes a sound basic knowledge of programming and database concepts and skills as developed in the introductory units in these areas. The emphasis in the unit is on mastery of the key concepts and the basic knowledge and skills required to build this kind of application. The unit will provide students with an awareness of the wide range of technologies which are used to support this kind of application, but will examine only a limited number of these technologies to demonstrate the key concepts and their application.

The unit will take a strongly practical focus in examining the technology issues involved, and highlight the key issues which a developer needs to address in developing applications of this kind for real-world systems.

Mode of Delivery

- Caulfield (Day)
- Malaysia (Day)

Workload Requirements

Minimum total expected workload equals 12 hours per week comprising:

(a.) Contact hours for on-campus students:

- Two hours of lectures
- One 2-hour laboratory

(b.) Additional requirements (all students):

- A minimum of 8 hours independent study per week for completing lab and project work, private study and revision.

Unit Relationships

Prohibitions

FIT2028, FIT2029, FIT3043, FIT3057

Prerequisites

One of FIT1002, FIT1008, FIT1035, FIT1040, FIT2034, FIT2071 or FIT2081 and one of FIT1004 or FIT2010

Chief Examiner

Ms Janet Fraser
Your feedback to Us

Monash is committed to excellence in education and regularly seeks feedback from students, employers and staff. One of the key formal ways students have to provide feedback is through the Student Evaluation of Teaching and Units (SETU) survey. The University’s student evaluation policy requires that every unit is evaluated each year. Students are strongly encouraged to complete the surveys. The feedback is anonymous and provides the Faculty with evidence of aspects that students are satisfied and areas for improvement.

For more information on Monash’s educational strategy, see:

www.monash.edu.au/about/monash-directions/ and on student evaluations, see:
www.policy.monash.edu/policy-bank/academic/education/quality/student-evaluation-policy.html

Previous Student Evaluations of this Unit

Students have previously struggled with the analysis and design aspects of creating a web-database application. The unit content has been amended to focus more on these aspects in the first 2-3 weeks of semester. Additionally students have indicated that the workload for this unit was too high when compared to other units - Assignments 1 and 2 will now be completed in teams of 2 students.

If you wish to view how previous students rated this unit, please go to
Academic Overview

Learning Outcomes

On completion of this unit, students should be able to:

- explain the need and importance for system developers to have skills in this area of IT applications;
- describe and compare the key basic technologies which underlie the development of web-database applications;
- evaluate and assess the key technological issues confronting developers building applications of this type;
- implement the key features of programming languages which are commonly used for developing web-database application;
- analyse, design, develop and implement a web-database application using a well-known programming language;
- evaluate and critique proposed web-database solutions to a business problem.
### Unit Schedule

Assessment Requirements

Assessment Policy

Faculty Policy - Unit Assessment Hurdles

Academic Integrity - Please see resources and tutorials at
http://www.monash.edu/library/skills/resources/tutorials/academic-integrity/

Assessment Tasks

Participation

• Assessment task 1

Title:
Assignment 1: Analysis & Design

Description:
Working in pairs, students will produce a solution proposal for a Real Estate firm. Students will be expected to give an in-class presentation which details their proposed solution to the described business problem. Students will be expected to mark and critique other groups presentations.

Weighting:
15%

Criteria for assessment:

♦ The quality and professionalism of the submitted report.
♦ The quality and professionalism of the solution presentation and the quality of the arguments presented.
♦ How well the proposed solution meets the needs of the client.
♦ The degree to which students engage in tutorial activities - e.g. client interviews and critical assessment of other groups presentation.

Students will be required to submit a work breakdown detailing each group member’s participation.

Confirm with Lecturer about specific location of marking guide available at http://walkabout.infotech.monash.edu.au/walkabout/fit2076

Due date:
Presentation during tutorial in Week 4. Report due Friday 22 August 2014, 2pm

• Assessment task 2

Title:
Assignment 2: Construction - PHP

Description:
Working in pairs, students will produce a PHP based web-database application which provides the solution for the proposal submitted in Assignment 1. This application will enable the maintenance of rental properties for a Real Estate firm.

Weighting:
20%
Assessment Requirements

Criteria for assessment:

♦ The degree to which the submitted web-database application meets the clients requirements.
♦ The design quality and usability of the submitted application.
♦ How efficiently the code is written and the level and completeness of code documentation.

Students will be required to submit a work breakdown detailing each group member's participation.

Confirm with Lecturer about specific location of marking guide available at http://walkabout.infotech.monash.edu.au/walkabout/fit2076

Due date:
Friday 10 October 2014, 2pm

Assessment task 3

Title:
Assignment 3: Construction - CakePHP

Description:
Working individually, students will create a CakePHP application which enables users to search for purchase and rental properties for a Real Estate firm.

Weighting:
5%

Criteria for assessment:

♦ The degree to which the submitted web-database application meets the clients requirements.
♦ The design quality and usability of the submitted application.
♦ How efficiently the code is written and the level and completeness of code documentation.

Confirm with Lecturer about specific location of marking guide available at http://walkabout.infotech.monash.edu.au/walkabout/fit2076

Due date:
Friday 24 October 2014, 2pm

Examinations

• Examination 1

Weighting:
60%

Length:
3 hours

Type (open/closed book):
Closed book

Electronic devices allowed in the exam:
None
Learning resources

Faculty of Information Technology Style Guide

Feedback to you

Examination/other end-of-semester assessment feedback may take the form of feedback classes, provision of sample answers or other group feedback after official results have been published. Please check with your lecturer on the feedback provided and take advantage of this prior to requesting individual consultations with staff. If your unit has an examination, you may request to view your examination script booklet, see
http://intranet.monash.edu.au/infotech/resources/students/procedures/request-to-view-exam-scripts.html

Types of feedback you can expect to receive in this unit are:

- Informal feedback on progress in labs/tutes
- Graded assignments without comments
- Interviews

Extensions and penalties

Submission must be made by the due date otherwise penalties will be enforced.

You must negotiate any extensions formally with your campus unit leader via the in-semester special consideration process: http://www.monash.edu.au/exams/special-consideration.html

Returning assignments

Students can expect assignments to be returned within two weeks of the submission date or after receipt, whichever is later.

Resubmission of assignments

Resubmission of assignments is not allowed.

Assignment submission

It is a University requirement (http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-academic-integrity-managing-plagiarism-collusion-procedures.html) for students to submit an assignment coversheet for each assessment item. Faculty Assignment coversheets can be found at http://www.infotech.monash.edu.au/resources/student/forms/. Please check with your Lecturer on the submission method for your assignment coversheet (e.g. attach a file to the online assignment submission, hand-in a hard copy, or use an online quiz). Please note that it is your responsibility to retain copies of your assessments.
Assessment Requirements

Online submission

If Electronic Submission has been approved for your unit, please submit your work via the learning system for this unit, which you can access via links in the my.monash portal.

Examination material or equipment

Refer to http://walkabout.infotech.monash.edu.au/walkabout/fit2076

Details will made available during semester. Please confirm with Lecturer.
Other Information

Policies

Monash has educational policies, procedures and guidelines, which are designed to ensure that staff and students are aware of the University’s academic standards, and to provide advice on how they might uphold them. You can find Monash’s Education Policies at: www.policy.monash.edu.au/policy-bank/academic/education/index.html

Key educational policies include:

- Student Academic Integrity Policy and Student Academic Integrity: Managing Plagiarism and Collusion Procedures; http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-academic-integrity-policy.html
- Special Consideration; http://www.policy.monash.edu/policy-bank/academic/education/assessment/special-consideration-policy.html
- Grading Scale; http://www.policy.monash.edu/policy-bank/academic/education/assessment/grading-scale-policy.html
- Discipline: Student Policy; http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-discipline-policy.html
- Academic Calendar and Semesters; http://www.monash.edu.au/students/dates/
- Orientation and Transition; http://intranet.monash.edu.au/infotech/resources/students/orientation/

Faculty resources and policies

Important student resources including Faculty policies are located at http://intranet.monash.edu.au/infotech/resources/students/

Graduate Attributes Policy

http://www.policy.monash.edu/policy-bank/academic/education/management/monash-graduate-attributes-policy.html

Student Charter

Student services

The University provides many different kinds of support services for you. Contact your tutor if you need advice and see the range of services available at http://www.monash.edu.au/students. For Malaysia see http://www.monash.edu.my/Student-services, and for South Africa see http://www.monash.ac.za/current/.
Monash University Library

The Monash University Library provides a range of services, resources and programs that enable you to save time and be more effective in your learning and research. Go to www.lib.monash.edu.au or the library tab in my.monash portal for more information. At Malaysia, visit the Library and Learning Commons at http://www.lib.monash.edu.my/. At South Africa visit http://www.lib.monash.ac.za/.

Disability Liaison Unit

Students who have a disability or medical condition are welcome to contact the Disability Liaison Unit to discuss academic support services. Disability Liaison Officers (DLOs) visit all Victorian campuses on a regular basis.

- Website: http://www.monash.edu/equity-diversity/disability/index.html
- Telephone: 03 9905 5704 to book an appointment with a DLO; or contact the Student Advisor, Student Community Services at 03 55146018 at Malaysia
- Email: dlu@monash.edu
- Drop In: Equity and Diversity Centre, Level 1, Building 55, Clayton Campus, or Student Community Services Department, Level 2, Building 2, Monash University, Malaysia Campus
