FIT5163 Information and computer security - Semester 1, 2015

The unit aims to provide the students with in depth knowledge of techniques required to deal with security problems in information systems. The main areas of study include symmetric and asymmetric encryption techniques, cryptographic hash functions with related topics of message authentication codes and digital signatures. Study of techniques and algorithms for providing mutual trust include key management and distribution and user authentication to establish trust in the identity of communicating partner are also included. It looks at various management issues, including use and abuse of encryption, distributed systems authentication and integrity management. A range of security applications are used as examples. Students will learn how to apply cryptographic techniques in practice.

Mode of Delivery

Caulfield (Evening)

Workload Requirements

Minimum total expected workload equals 12 hours per week comprising:

(a.) Contact hours for on-campus students:

- Two hours of lectures
- One 2-hour tutorial

(b.) Additional requirements (all students):

- A minimum of 8 hours independent study per week for completing tutorial and project work, private study and revision.

See also Unit timetable information

Unit Relationships

Prohibitions

FIT4016

Prerequisites

(([FIT9131](#) or FIT5131 or FIT9017) and ([FIT9134](#) or FIT5134 or FIT9018) and ([FIT9132](#) or FIT5132 or FIT9003 or FIT9019) and ([FIT9135](#) or [FIT5135](#) or FIT9020) and ([FIT5136](#) or FIT4037) and ([FIT9130](#) or FIT5130 or FIT9030)) or equivalent

Introductory knowledge of computing at the undergraduate level is assumed.

Chief Examiner

Dr Nandita Bhattacharjee

Campus Lecturer

Caulfield

Nandita Bhattacharjee

Your feedback to Us

Monash is committed to excellence in education and regularly seeks feedback from students, employers and staff. One of the key formal ways students have to provide feedback is through the Student Evaluation of Teaching and Units (SETU) survey. The University's student evaluation policy requires that every unit is evaluated each year. Students are strongly encouraged to complete the surveys. The feedback is anonymous and provides the Faculty with evidence of aspects that students are satisfied and areas for improvement.

For more information on Monash's educational strategy, see:

www.monash.edu.au/about/monash-directions/ and on student evaluations, see:
www.policy.monash.edu/policy-bank/academic/education/quality/student-evaluation-policy.html

Previous Student Evaluations of this Unit

Students were very happy with the unit overall. Student feedback highlighted the following strengths:

- intellectually stimulating
- regular useful feedback
- tutorials and laboratory tasks
- assessments and assessment strategies
- active participation

This feedback can be used to strengthen the learning outcomes further by increasing the depth of some topics in cryptography.

If you wish to view how previous students rated this unit, please go to
<https://emuapps.monash.edu.au/unitevaluations/index.jsp>

Academic Overview

Learning Outcomes

At the completion of this unit students should be able to:

- critically assess threats, vulnerabilities and risks to an organisation's information assets, and propose control technologies and techniques which can be applied to reduce the security risk;
- apply a variety of cryptographic algorithms to develop methods to disguise information to ensure its integrity, confidentiality and authenticity;
- apply a variety of methods for key management and distribution and analyse the risks associated with the various approaches;
- implement user authentication and access control mechanisms to create a security architecture to protect the assets of the information system;
- implement cryptographic techniques to preserve the security of information and evaluate its effectiveness;
- apply a variety of security control technologies to IT systems in an organisation.

Unit Schedule

Week	Activities	Assessment
0		No formal assessment or activities are undertaken in week 0
1	Introduction to information security	
2	Principles of encryption	
3	Cryptography I	
4	Cryptography II	Class Test 1 during the Week 4 Lecture
5	Examples of Private Key Encryption	
6	Introduction to number theory	
7	Public key cryptography	
8	Integrity & non-repudiation	Class Test 2 during the Week 8 Lecture
9	Key management & distributed authentication	
10	Access Control	
11	Risk Management	Assignment Presentation due Week 11 Tutorial
12	Ethics and Privacy	Class Test 3 during the Week 12 Lecture. Assignment Report due 3PM, 29 May 2015
	SWOT VAC	No formal assessment is undertaken in SWOT VAC
	Examination period	LINK to Assessment Policy: http://policy.monash.edu.au/policy-bank/academic/education/assessment/assessment-in-coursework-policy.html

*Unit Schedule details will be maintained and communicated to you via your learning system.

Teaching Approach

Lecture and tutorials or problem classes

This teaching and learning approach helps students to initially encounter information at lectures, discuss and explore the information during tutorials, and practice in a hands-on lab environment.

Assessment Summary

Examination (3 hours): 60%; In-semester assessment: 40%

Assessment Task	Value	Due Date
Class Tests	20% (10% each, best 2 attempts out of 3)	Week 4, 8 and 12 Lectures
Group Assignment - Biometrics in Cryptography	20% (Presentation 6%, Report 14%)	Presentation due Week 11 Tutorial. Report due 3PM, 29 May 2015.

Unit Schedule

Examination 1

60%

To be advised

Assessment Requirements

Assessment Policy

Faculty Policy - Unit Assessment Hurdles

(<http://intranet.monash.edu.au/infotech/resources/staff/edgov/policies/assessment-examinations/assessment-hurdles>)

Academic Integrity - Please see resources and tutorials at

<http://www.monash.edu/library/skills/resources/tutorials/academic-integrity/>

Assessment Tasks

Participation

• Assessment task 1

Title:

Class Tests

Description:

Three Class Tests will be conducted on the topics covered in this unit. They will be held during Lectures. Each Class Test will have a weighting of 10%. The best two of the three scores will constitute an assessment total of 20%.

Weighting:

20% (10% each, best 2 attempts out of 3)

Criteria for assessment:

1. Quality and accuracy of answers in response to test questions.
2. How well underlying principles and theories are demonstrated in the student's answers.

Due date:

Week 4, 8 and 12 Lectures

• Assessment task 2

Title:

Group Assignment - Biometrics in Cryptography

Description:

In this assignment students will be working in groups of two or three members. This assignment explores how the iris image of an individual can be used to generate the key for private key cryptography. In other words, we would like to integrate the biometric, in this case the iris with cryptography so that security of the system authentication as well as information security can be achieved.

Details of the tasks will be provided in the assignment handout. Students presentations on the assignment are due in Week 11 Tutorials. A comprehensive report is due in Week 12.

Weighting:

20% (Presentation 6%, Report 14%)

Criteria for assessment:

How well understanding of the allocated task is demonstrated.

Each student completes an allocated task that contributes to the final report, and receives marks for that task. Students will give individual presentations of their allocated task. Peer

Assessment Requirements

review will assess peer learning and peer support.

Due date:

Presentation due Week 11 Tutorial. Report due 3PM, 29 May 2015.

Examinations

• Examination 1

Weighting:

60%

Length:

3 hours

Type (open/closed book):

Closed book

Electronic devices allowed in the exam:

None

Learning resources

Reading list

1. Cryptography and Network Security: Principles and Practice. William Stallings, 6th Edition, 2014. Prentice Hall.
2. Computer Security: Principles and Practice William Stallings and Lawrie Brown, 2012, Prentice Hall.
3. Security Engineering: A guide to building dependable distributed systems. Ross J. Anderson, 2nd Edition, 2008, John Wiley & Sons, Inc.

Monash Library Unit Reading List (if applicable to the unit)

<http://readinglists.lib.monash.edu/index.html>

Feedback to you

Types of feedback you can expect to receive in this unit are:

- Informal feedback on progress in labs/tutes
- Test results and feedback
- Quiz results
- Other: Answers to discussion sheets & individual student meetings

Extensions and penalties

Submission must be made by the due date otherwise penalties will be enforced.

You must negotiate any extensions formally with your campus unit leader via the in-semester special consideration process: <http://www.monash.edu.au/exams/special-consideration.html>

Returning assignments

Students can expect assignments to be returned within two weeks of the submission date or after receipt, whichever is later.

Assignment submission

It is a University requirement

(<http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-academic-integrity-managing-pla>

for students to submit an assignment coversheet for each assessment item. Faculty Assignment coversheets can be found at <http://www.infotech.monash.edu.au/resources/student/forms/>. Please check with your Lecturer on the submission method for your assignment coversheet (e.g. attach a file to the online assignment submission, hand-in a hard copy, or use an electronic submission). Please note that it is your responsibility to retain copies of your assessments.

Online submission

If Electronic Submission has been approved for your unit, please submit your work via the learning system for this unit, which you can access via links in the my.monash portal.

Other Information

Policies

Monash has educational policies, procedures and guidelines, which are designed to ensure that staff and students are aware of the University's academic standards, and to provide advice on how they might uphold them. You can find Monash's Education Policies at:

www.policy.monash.edu.au/policy-bank/academic/education/index.html

Faculty resources and policies

Important student resources including Faculty policies are located at

<http://intranet.monash.edu.au/infotech/resources/students/>

Graduate Attributes Policy

<http://www.policy.monash.edu/policy-bank/academic/education/management/monash-graduate-attributes-policy.h>

Student Charter

www.opq.monash.edu.au/ep/student-charter/monash-university-student-charter.html

Student services

The University provides many different kinds of support services for you. Contact your tutor if you need advice and see the range of services available at <http://www.monash.edu.au/students>. For Malaysia see <http://www.monash.edu.my/Student-services>, and for South Africa see <http://www.monash.ac.za/current/>.

Monash University Library

The Monash University Library provides a range of services, resources and programs that enable you to save time and be more effective in your learning and research. Go to www.lib.monash.edu.au or the library tab in [my.monash](#) portal for more information. At Malaysia, visit the Library and Learning Commons at <http://www.lib.monash.edu.my/>. At South Africa visit <http://www.lib.monash.ac.za/>.

Disability Liaison Unit

Students who have a disability or medical condition are welcome to contact the Disability Liaison Unit to discuss academic support services. Disability Liaison Officers (DLOs) visit all Victorian campuses on a regular basis.

- Website: <http://www.monash.edu/equity-diversity/disability/index.html>
- Telephone: 03 9905 5704 to book an appointment with a DLO; or contact the Student Advisor, Student Community Services at 03 55146018 at Malaysia
- Email: dlu@monash.edu
- Drop In: Equity and Diversity Centre, Level 1, Building 55, Clayton Campus, or Student Community Services Department, Level 2, Building 2, Monash University, Malaysia Campus
