FIT1002 Computer programming - Summer semester, 2015

This unit will provide students with an overview of programming and its role in problem-solving and strategies for meeting user requirements and for designing solutions to programming problems. The fundamental programming concepts of the memory model, data types, declarations, expressions and statements, control structures, block structure, modules, parameters and input and output will be applied within the context of objects, attributes, methods, re-use, information-hiding, encapsulation and message-passing. Software engineering topics include maintainability, readability, testing, documentation and modularisation.

Mode of Delivery

South Africa Summer semester B (Day)

Workload Requirements

Minimum total expected workload equals 12 hours per week comprising:

(a.) Contact hours for on-campus students:

- Two hours lectures
- Two hours laboratories
- One hour tutorial

(b.) Additional requirements (all students):

- A minimum of 2-3 hours of personal study per one hour of lecture time in order to satisfy the reading, tute, prac and assignment expectations.

See also Unit timetable information

Additional workload requirements

This unit runs 5 days per week (Monday to Friday) for 3 weeks. The work consists of full days (8 hours) of study, consisting of:

- Two-hours of lectures
- One-hour tutorial class to discuss theoretical programming concepts and develop problem solving strategies
- Two-hour laboratory (practical class) (requiring advance preparation)
- A minimum of 3 hours of personal study in order to satisfy the reading, tute, prac and assignment expectations.

Unit Relationships

Prohibitions

CPE1001, CSE1202, GCO1811, MMS1801, MMS1802
Your feedback to Us

Monash is committed to excellence in education and regularly seeks feedback from students, employers and staff. One of the key formal ways students have to provide feedback is through the Student Evaluation of Teaching and Units (SETU) survey. The University’s student evaluation policy requires that every unit is evaluated each year. Students are strongly encouraged to complete the surveys. The feedback is anonymous and provides the Faculty with evidence of aspects that students are satisfied and areas for improvement.

For more information on Monash's educational strategy, see:

www.monash.edu.au/about/monash-directions/ and on student evaluations, see:
www.policy.monash.edu/policy-bank/academic/education/quality/student-evaluation-policy.html

Previous Student Evaluations of this Unit

Improvements we have made to the unit from last delivery include:

Short quizzes will be held each day after time is given to consult lecture slides and discuss the questions with fellow students.

If you wish to view how previous students rated this unit, please go to
Academic Overview

Learning Outcomes

At the completion of this unit students will have -An understanding of:

- the relationship between a problem description and program design;
- the management of problems using recognised frameworks;
- the use of design representations;
- the semantics of imperative programs;
- the object oriented paradigm as represented by Java;
- the sequence of steps that a computer takes to translate source code into executable code; and
- primitive data types and basic data structures.

Developed attitudes that enable them to:

- adopt a problem-solving approach;
- recognise the importance of programming and documentation conventions;
- appreciate quality parameters in program development;
- accept the code of professional conduct and practice; and
- act in accordance with best practice, industry standards and professional ethics.

Developed the skills to:

- use diagrams to design solutions for programming problems;
- apply problem solving strategies;
- use pseudo-code to design algorithms;
- design object oriented solutions to simple problems using multiple user-defined classes;
- create and test programming solutions to problems using the Java programming language;
- edit, compile and execute a computer program;
- analyse and debug existing programs; and
- write a test plan.

Demonstrated the communication skills necessary to:

- produce formal documentation for a program; and
- explain an existing program.
### Unit Schedule

### Teaching Approach

**Lecture and tutorials or problem classes**

This teaching and learning approach provides facilitated learning, practical exploration and peer learning.
## Assessment Summary

Examination (3 hours): 60%; In-semester assessment: 40%

Assessment Requirements

Assessment Policy

Faculty Policy - Unit Assessment Hurdles

Academic Integrity - Please see resources and tutorials at
http://www.monash.edu/library/skills/resources/tutorials/academic-integrity/

Assessment Tasks

Participation

• Assessment task 1

  Title: Assignment 1 - JAVA basics

  Description: This assignment will aim to help you to develop programs in Java using classes and objects that are able to read input from the user and format output. You will also learn to use classes and their methods that are available from the Java library.

  Weighting: 10%

  Criteria for assessment: Detailed assessment criteria will be issued along with the assignment.

  1. All programs must run and compile correctly. Evidence of testing is required.
  2. Programs must meet the problem specification
  3. JAVA code should be readable and maintainable and follow the style recommended in the prescribed text book.
  4. Programs should be documented
  5. Students should be able to answer questions about their own work

  Due date: Friday 5:00pm Week 7

• Assessment task 2

  Title: Assignment 2 - Designing a JAVA application involving several classes and arrays of objects

  Description: This assignment will require students to use the selection and iteration control structures and methods. Students will also be expected to design UML class diagrams and write Java code to solve a problem that will involve many classes and an array of objects.

  Weighting: 10%

  Criteria for assessment: Detailed assessment criteria will be issued along with the assignment.

  1. All programs must run and compile correctly. Evidence of testing is required.
  2. Programs must meet the problem specification
JAVA code should be readable and maintainable and follow the style recommended in the prescribed text book.

4. Programs should be documented

5. Students should be able to answer questions about their own work during an interview scheduled outside the lab class

Due date:
Friday 5:00pm Week 11; Interviews held in Week 12

• Assessment task 3

Title:
Laboratory Work and Short Tutorial Tests

Description:
In Weeks 2 - 11 students will be expected to write and execute code to perform a task specified at the start of their Laboratory session. The specified coding task will come from a Laboratory task specification sheet released prior to each Laboratory session allowing for preparation.

Students will be expected to complete a very short test at the end of each Tutorial session. The test will ask 5 short answer questions on the lecture material for the week the Tutorial is based on.

Weighting:
20%

Criteria for assessment:
Laboratory work will be assessed during the Laboratory session. Full marks will require both working code and good coding style with the latter carrying more weight.

Tutorial short tests will be marked by tutors after the tutorial. The questions will examine both conceptual and syntax knowledge covered in the lecture slides relevant to the tutorial. Required answers will be short and generally attract a mark of 0 or 1 (scaled appropriately for inclusion into the final mark for the unit).

Due date:
The end of the Laboratory session in Weeks 2 - 11 in which the work is performed.

Examinations

• Examination 1

Weighting:
60%

Length:
3 hours

Type (open/closed book):
Closed book

Electronic devices allowed in the exam:
None

Learning resources
Assessment Requirements

Reading list

For students with advanced programming skills:

Monash Library Unit Reading List (if applicable to the unit)
http://readinglists.lib.monash.edu/index.html

Faculty of Information Technology Style Guide

Feedback to you

Examination/other end-of-semester assessment feedback may take the form of feedback classes, provision of sample answers or other group feedback after official results have been published. Please check with your lecturer on the feedback provided and take advantage of this prior to requesting individual consultations with staff. If your unit has an examination, you may request to view your examination script booklet, see http://intranet.monash.edu.au/infotech/resources/students/procedures/request-to-view-exam-scripts.html

Types of feedback you can expect to receive in this unit are:

- Informal feedback on progress in labs/tutes
- Graded assignments with comments
- Interviews
- Test results and feedback
- Quiz results
- Solutions to tutes, labs and assignments

Extensions and penalties

Submission must be made by the due date otherwise penalties will be enforced.

You must negotiate any extensions formally with your campus unit leader via the in-semester special consideration process: http://www.monash.edu.au/exams/special-consideration.html

Returning assignments

Students can expect assignments to be returned within two weeks of the submission date or after receipt, whichever is later.

Assignment submission

It is a University requirement for students to submit an assignment coversheet for each assessment item. Faculty Assignment
Assessment Requirements

coversheets can be found at http://www.infotech.monash.edu.au/resources/student/forms/. Please check with your Lecturer on the submission method for your assignment coversheet (e.g. attach a file to the online assignment submission, hand-in a hard copy, or use an online quiz). Please note that it is your responsibility to retain copies of your assessments.

Online submission

If Electronic Submission has been approved for your unit, please submit your work via the learning system for this unit, which you can access via links in the my.monash portal.

Required Resources

Please check with your lecturer before purchasing any Required Resources. Limited copies of prescribed texts are available for you to borrow in the library, and prescribed software is available in student labs.

Java Development Kit, Version 6 or later, published by Oracle. The latest version (Version 7) is available for download for free from: http://docs.oracle.com/javase/7/docs/webnotes/install/index.html

In addition to the Java Development Kit, students should have access to at least one of the following Integrated Development Environments, which the FIT1002 teaching team recommend:

- **JCreator** (latest version) downloaded from http://www.jcreator.com/
  Students are advised to download the free version (i.e. the LE version). There is no need for the fuller facilities provided in JcreatorPro.
- **jEdit** (latest version) downloaded from http://www.jedit.org/
- **BlueJay** (latest version) - sources to be provided.

Prescribed text(s)

Limited copies of prescribed texts are available for you to borrow in the library.

Other Information

Policies

Monash has educational policies, procedures and guidelines, which are designed to ensure that staff and students are aware of the University’s academic standards, and to provide advice on how they might uphold them. You can find Monash’s Education Policies at: www.policy.monash.edu.au/policy-bank/academic/education/index.html

Key educational policies include:

- Student Academic Integrity Policy and Student Academic Integrity: Managing Plagiarism and Collusion Procedures; http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-academic-integrity-policy.html
- Special Consideration; http://www.policy.monash.edu/policy-bank/academic/education/assessment/special-consideration-policy.html
- Grading Scale; http://www.policy.monash.edu/policy-bank/academic/education/assessment/grading-scale-policy.html
- Discipline: Student Policy; http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-discipline-policy.html
- Academic Calendar and Semesters; http://www.monash.edu.au/students/dates/
- Orientation and Transition; http://intranet.monash.edu.au/infotech/resources/students/orientation/

Faculty resources and policies

Important student resources including Faculty policies are located at http://intranet.monash.edu.au/infotech/resources/students/

Graduate Attributes Policy

http://www.policy.monash.edu/policy-bank/academic/education/management/monash-graduate-attributes-policy.html

Student Charter

Student services

The University provides many different kinds of support services for you. Contact your tutor if you need advice and see the range of services available at http://www.monash.edu.au/students. For Malaysia see http://www.monash.edu.my/Student-services, and for South Africa see http://www.monash.ac.za/current/.
Monash University Library

The Monash University Library provides a range of services, resources and programs that enable you to save time and be more effective in your learning and research. Go to www.lib.monash.edu.au or the library tab in my.monash portal for more information. At Malaysia, visit the Library and Learning Commons at http://www.lib.monash.edu.my/. At South Africa visit http://www.lib.monash.ac.za/.

Disability Liaison Unit

Students who have a disability or medical condition are welcome to contact the Disability Liaison Unit to discuss academic support services. Disability Liaison Officers (DLOs) visit all Victorian campuses on a regular basis.

- Website: http://www.monash.edu/equity-diversity/disability/index.html
- Telephone: 03 9905 5704 to book an appointment with a DLO; or contact the Student Advisor, Student Community Services at 03 55146018 at Malaysia
- Email: dlu@monash.edu
- Drop In: Equity and Diversity Centre, Level 1, Building 55, Clayton Campus, or Student Community Services Department, Level 2, Building 2, Monash University, Malaysia Campus
