FIT5152
User interface design and usability

Unit Guide

Summer semester, 2014

The information contained in this unit guide is correct at time of publication. The University has the right to change any of the elements contained in this document at any time.

Last updated: 14 Nov 2013
FIT5152 User interface design and usability - Summer semester, 2014

This unit provides detailed understanding of user interface design principles and practices and usability for computer-based systems. The principles, guidelines and standards for incorporating human factors in computer interface design are explored. The unit examines issues in interface design and usability from various perspectives and how to manage this during systems development. It explores contemporary issues including: background and underpinning theories, guidelines and standards, design processes and implementation in practice, user interface evaluation methods, interface styles and componential design. The application of HCI design in other environments such as virtual reality and mobile devices will be covered.

Contact Hours

Workload requirements

Summer semester is a very intensive period of study: the same amount of material and assessment covered in a normal semester of 12 weeks plus a non-teaching week, and examined following a swot vac period, is covered and examined in around 6 weeks. Tutorial classes and lectures commence January 6th 2014.

The unit is an on-campus unit and as such is structured, taught and assessed on the assumption that ALL students who choose to enrol can, and will, attend ALL classes. Assessment tasks for the unit require attendance at classes as part of the assessment criteria.

This is a 6 point unit which, according to University guidelines, requires you to spend 12 hours of work per lecture/tutorial on it (a total of at least 144 hours per semester).

The anticipated workload is:

- 2 x 2 hours per week lecture (commencing January 6th 2014), and
- 2 x 1.5 hours per week tutorial/laboratory (commencing January 6th 2014)

Plus approximately:

- 5.5 hours per lecture/tutorial on preparation, online contributions and assignments, and
- 3 hours per lecture/tutorial minimum on additional reading.

Academic Overview

Learning Outcomes

At the completion of this unit students should be able to:

- understand from a management as well as technology perspective how the theories, guidelines and standards can be incorporated into the design of user interfaces;
- understand and apply the principles of interface design relating to HCI, this includes recognising good and bad examples;
- apply the standards, principles and theories in practice.
- develop and conduct usability evaluations and be able to interpret the results, identify changes that are needed to a user interface
- understand the different design considerations for designing for the Web and other devices
- understand the different user centred development methodologies that look at design from a user perspective. In particular have knowledge of the basic principles of good interface design and HCI principles;
- appreciate the difficulties users face when working with systems and be able to comprehend the concepts and principles underlying effective interface design and recognise good design from poor design and what the difference is from a user perspective;
- develop attitudes which enable them to interact effectively with users in order to apply this knowledge to the design of interfaces for a range of technologies;
- analyse the component parts of an interface so to be able to identify what is good design;
- synthesise the knowledge, guidelines and theory to understand how each contributes to practice;
- effectively conduct an evaluation of an information system especially in terms of usability of information systems;
- understand the development of systems from a user perspective;
- appreciate the difficulties users face when working with systems;
- apply the principles, standards and theories relating to interface design and HCI to information systems development;
- gather user requirements effectively;
- design an effective user interface;
- conduct a usability test and interpret the outcome;
- recognise poor design and solutions.
## Unit Schedule

Teaching Approach

- **Lecture and tutorials or problem classes**
  This teaching and learning approach provides facilitated learning, practical exploration and peer learning.
- **Other**
  Moodle discussion and readings: Students are encouraged to take responsibility for organising and directing their learning.
Assessment Requirements

Assessment Policy

Faculty Policy - Unit Assessment Hurdles

Academic Integrity - Please see the Demystifying Citing and Referencing tutorial at
http://lib.monash.edu/tutorials/citing/

Assessment Tasks

Participation

During the semester you will be assessed on work in, and preparation for, tutorials (8%), in particular the specifically assigned reading for each week and comments posted to the discussion forum (7%). The assessment of this component will be dependent on the quality of your answers based on the readings. A number of exercises may be set and students will be expected to complete those exercises either during the tutorial, or in preparation for the tutorial, and to actively participate in tutorial classes. Assessment will occur in ALL tutorials throughout the semester. The quality and number of postings on the discussion forum in Moodle will be assessed. Your peers will also contribute to your final assessment for participation.

This assessment will constitute 15% of your marks. No marks are awarded for simply attending tutorials.

• Assessment task 1

  Title: Assignment 1

  Description: Students will demonstrate, in class, their knowledge and understanding of form design and the relevant theories covered in the unit up to this point of the semester. Students will be required to design a form based on their knowledge and justify their design decisions.

  Further details will be provided and posted on Moodle early in semester.

  Weighting: 10%

  Criteria for assessment: Quality of the design and the justification provided for the design.

  Due date: Monday 20th January 2014

• Assessment task 2

  Title: Assignment 2

  Description: Assignment 2 is a group assignment. No student will be permitted to do this assignment individually and all group members must belong to the same tutorial. The forming of groups across tutorials will not be permitted.
There are two components to the assignment, a written component and a presentation. The assignment is designed to provide you with the practical experience of designing and conducting an evaluation of an interface.

The written component will be the design, implementation and evaluation of a website, in line with what has been studied during the semester. Websites available for the assignment and all relevant details will be provided in the assignment specification.

Group presentations will take place in class on the due date stated below.

Further details will be provided in semester.

Weighting:
25% (20% written component, 5% presentation)

Criteria for assessment:
All students in the group will be given the same mark unless an adjustment is made by the lecturer based on feedback from the group.

The written component will be assessed on the design and conduct of an evaluation of a selected website and background information, the analysis of that evaluation and a written report on the outcome of the evaluation. Students are also required to demonstrate an understanding of the concepts and background literature on evaluation techniques.

The presentation will be assessed on the quality of the presentation and the delivery, the content selected for the presentation and its relevance.

Due date:
Written component - 12th February 2014. Presentations - 10th February 2014

Remarks:
Students will be asked to provide confidential peer assessment of the work and contribution of each member of the group. This will be taken into account when the final marks are awarded. An individual's mark in the group may be adjusted up or down in the light of their individual contribution. Each student in the group will be required to detail their contribution to the group's assignment and this is to be submitted, individually, in the lecture theatre before the commencement of the last lecture of semester. This will also be used where necessary to adjust marks.

The lecturer may request an interview with groups or individuals if required to clarify any points relating to the content of these submissions.

• Assessment task 3

Title:
Active participation in tutorials and contributions to the discussion forum

Description:
Throughout the semester you are expected to actively participate in tutorial classes. Students will be asked questions relating to the reading material and the tutorial tasks. Throughout the semester you are expected contribute to the online forum discussions, including posting new topics that are relevant to the unit and meaningful responses to the postings of other students. See above for the breakdown of marks.

Weighting:
15%

Criteria for assessment:
Quality of answers / responses.

Demonstrate an understanding of the reading material provided.
Assessment Requirements

No marks are awarded for simply attending tutorials.

Due date:
Ongoing throughout semester

Examinations

• Examination 1

  Weighting:
  50%

  Length:
  3 hours

  Type (open/closed book):
  Closed book

  Electronic devices allowed in the exam:
  None

Learning resources

Monash Library Unit Reading List
http://readinglists.lib.monash.edu/index.html

Feedback to you

Examination/other end-of-semester assessment feedback may take the form of feedback classes, provision of sample answers or other group feedback. Please check with your lecturer on the feedback provided and take advantage of this prior to requesting individual consultations with staff. If your unit has an examination, you may request to view your examination script booklet, see http://intranet.monash.edu.au/infotech/resources/students/procedures/request-to-view-exam-scripts.html

Types of feedback you can expect to receive in this unit are:

• Informal feedback on progress in labs/tutes
• Graded assignments with comments

Extensions and penalties

Submission must be made by the due date otherwise penalties will be enforced.

You must negotiate any extensions formally with your campus unit leader via the in-semester special consideration process: http://www.monash.edu.au/exams/special-consideration.html

Returning assignments

Students can expect assignments to be returned within two weeks of the submission date or after receipt, whichever is later.
Referencing requirements

Students should be aware of and adhere to the guidelines for referencing assignment work. Harvard style is the required format for referencing. This will be discussed in class early in the semester. Please also refer to the guidelines provided by the library.

Assignment submission

It is a University requirement (http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-academic-integrity-managing-plagiarism-collusion-procedures.html) for students to submit an assignment coversheet for each assessment item. Faculty Assignment coversheets can be found at http://www.infotech.monash.edu.au/resources/student/forms/. Please check with your Lecturer on the submission method for your assignment coversheet (e.g. attach a file to the online assignment submission, hand-in a hard copy, or use an online quiz). Please note that it is your responsibility to retain copies of your assessments.

Online submission

If Electronic Submission has been approved for your unit, please submit your work via the learning system for this unit, which you can access via links in the my.monash portal.

Required Resources

Please check with your lecturer before purchasing any Required Resources. Limited copies of prescribed texts are available for you to borrow in the library, and prescribed software is available in student labs.

A reading list and other resources, for each tutorial, will be available as required on Moodle. All reading and other material will be provided online.

Prescribed text(s)

Limited copies of prescribed texts are available for you to borrow in the library.

Other Information

Policies

Monash has educational policies, procedures and guidelines, which are designed to ensure that staff and students are aware of the University’s academic standards, and to provide advice on how they might uphold them. You can find Monash’s Education Policies at: www.policy.monash.edu.au/policy-bank/academic/education/index.html

Key educational policies include:

- Academic integrity; http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-academic-integrity-policy.html
- Special Consideration; http://www.policy.monash.edu/policy-bank/academic/education/assessment/special-consideration-policy.html
- Grading Scale; http://www.policy.monash.edu/policy-bank/academic/education/assessment/grading-scale-policy.html
- Discipline: Student Policy; http://www.policy.monash.edu/policy-bank/academic/education/conduct/student-discipline-policy.html
- Academic Calendar and Semesters; http://www.monash.edu.au/students/dates/
- Orientation and Transition; http://intranet.monash.edu.au/infotech/resources/students/orientation/
- Graduate Attributes Policy http://www.policy.monash.edu/policy-bank/academic/education/management/monash-graduate-attributes-policy.html

Student services

The University provides many different kinds of support services for you. Contact your tutor if you need advice and see the range of services available at http://www.monash.edu.au/students. For Sunway see http://www.monash.edu.my/Student-services, and for South Africa see http://www.monash.ac.za/current/.

Monash University Library

The Monash University Library provides a range of services, resources and programs that enable you to save time and be more effective in your learning and research. Go to www.lib.monash.edu.au or the library tab in my.monash portal for more information. At Sunway, visit the Library and Learning Commons at http://www.lib.monash.edu.my/. At South Africa visit http://www.lib.monash.ac.za/.
Disability Liaison Unit

Students who have a disability or medical condition are welcome to contact the Disability Liaison Unit to discuss academic support services. Disability Liaison Officers (DLOs) visit all Victorian campuses on a regular basis.

Website: http://www.monash.edu/equity-diversity/disability/index.html
Telephone: 03 9905 5704 to book an appointment with a DLO; or contact the Student Advisor, Student Community Services at 03 55146018 at Sunway
Email: dlu@monash.edu
Drop In: Equity and Diversity Centre, Level 1, Building 55, Clayton Campus, or Student Community Services Department, Level 2, Building 2, Monash University, Sunway Campus

Your feedback to Us

Monash is committed to excellence in education and regularly seeks feedback from students, employers and staff. One of the key formal ways students have to provide feedback is through the Student Evaluation of Teaching and Units (SETU) survey. The University’s student evaluation policy requires that every unit is evaluated each year. Students are strongly encouraged to complete the surveys. The feedback is anonymous and provides the Faculty with evidence of aspects that students are satisfied and areas for improvement.

For more information on Monash’s educational strategy, see:
www.monash.edu.au/about/monash-directions and on student evaluations, see:
www.policy.monash.edu/policy-bank/academic/education/quality/student-evaluation-policy.html

Previous Student Evaluations of this Unit

This unit is continuously reviewed, lecture and tutorial, material and assignments change as does the exam each semester.

As a result of previous student comments the percentage allocated to tutorial participation and Moodle forums has been reduced with a stronger emphasis on the last assignment.

If you wish to view how previous students rated this unit, please go to https://emuapps.monash.edu.au/unitevaluations/index.jsp
